Good morning Mr Eastman

I was provided your name as a point of contact, regarding a Roundabout in our community of residence.

This note is submitted to express our support of a roundabout being established at the intersection of W Belmont Rd and Belmont Rd, here in the City of Richmond VA.

Thank you all for your assistance in bringing this to full fruition.

Terry & Orlantha Cain

Dear Jeff

I am a resident of the Brookbury Community a part of the Upper Reservoir Neighborhood at large and just wish to add my household's support to having the Round-About installed. As an active member of my community, I am excited to know that city leadership sees the wisdom in investing in safe roadways in and around the city. It is my fervent wish that our community enjoy what other communities around the city now enjoy. Safe roadways. Please let me know if you require anything else to support this project. I will be unable to attend the Dec 10th meeting due to prior commitments.

Warm Regards  
Terrie C McSween

Dear Mr. Eastman,  
Our home is on the corner of Belmont Rd & W. Belmont Rd. We are very happy to have a round about being considered at this intersection.  
Several high speed chases have taken place recently on Belmont Rd. endangering our neighborhood. This is a very busy intersection where the speed limits are seldom observed.  
We feel a round about will not only create a safer environment but provide a greater aesthetic to an already lovely avenue.  
We hope the City of Richmond approves & follows through with this plan without delay.

Respectfully,

Mrs. Leslie de Chaunac  
5138 W. Belmont Rd.  
Richmond, VA. 23234

Hello, Mr. Eastman,

I am excited to see that the Belmont Rd. roundabout is still an active consideration. I am still very much in favor of a roundabout at that intersection. I hope that it will help with the speeding on Belmont Rd., the blind spot for cars entering from West Belmont and add to the beauty of one of our gateway roads from Chesterfield County. I'm pleased the design committee was willing to take into consideration some of the bike and pedestrian improvement suggestions made by Mr. Nicholas Smith. There is a significant amount of foot traffic on Belmont Rd. and the sidewalks running from the intersection where the roundabout will be to Walmsley Blvd. and then on to the current GRTC bus stop at Walmsley and Broad Rock. I am really excited about this project and thank you and all involved in trying to make our neighborhood safer and more attractive. Thank you.

Sincerely,

Catherine Welsh

3610 S. Belmont Rd.

Mr. Eastman, I hope that you and your family have had a enjoyable Thanksgiving.

Concerning the Belmont Round-About, I support the Round-About because it will prevent some possible accidents, drivers appear to respect this type of traffic system, when approaching you automatically slow down or come to a complete stop. Secondly, The landscaping that comes with the feature will add to the esthetics of the community, making it more appealing. After the project have been completed, drivers may utilize this intersection without the fear of having an accident from unseen approaching cars.

Thank you very kindly,

Amelia Lightner, President, Brookbury Civic / Homeowners Association
