Bob,

The FDA Board met last night and voted to approve the Zoning Committee's recommendation to not oppose your project as proposed.

Thanks for improving the neighborhood!

All the best,

Jack

Jack,

Thanks so much for coming by yesterday to take a look at my garage and to discuss my plans to "fix" the structure. I wanted to check with you concerning your comments on what the FDA response should be. I've attached a document that I've referred to concerning what to expect from the FDA. It indicates that:

The FDA will take one of three positions: oppose, not oppose, or support the request.

I only bring this up because during our discussion yesterday I thought you indicated that the letter would only indicate one option that the committee would *not oppose* the design plans. If this is the current policy that is certainly acceptable but I would prefer if the design is acceptable to your committee that the letter would *support the request* rather than the less positive not oppose verbiage. As you probably know a Special Use request is fairly expensive and not a simple or a quick process to accomplish so anything that I can do to help it be successful I will work to do. I'm certainly happy to discuss my request if or when you have a few spare minutes this afternoon or at a time that works best for you. Again thanks for the quick response and looking forward to discussing whatever is the current FDA position.

Cheers,
