Introduction

The applicant is requesting a special use permit (the "SUP") for the property known as 1205 N 34th Street (the "Property"). The SUP would authorize the construction of two single-family attached dwellings. While the single-family use is permitted by the underlying R-5 Single-Family Residential zoning district, the attached use is not and, therefore, the SUP is required.

Existing Conditions

SITE DESCRIPTION AND EXISTING LAND USE

The Property is located at the eastern line of N 34th Street between R Street and S Street. It is referenced by the City Assessor with tax parcel number E000-1104/044. The lot is approximately 50 feet in width, 120 feet in depth and contains approximately 6,031 square feet of lot area. The parcel is currently improved with a single-family detached dwelling. Access is provided along an east-west alley off N 34th Street which is located along the northern property line.

The properties in the vicinity are developed with a range of uses including residential, commercial, and institutional uses. Residential uses include attached and detached single-family and two-family dwellings as well as multi-family dwellings. The dwellings in the area consist of a wide range of forms but are primarily of frame construction with horizontal lap siding.

EXISTING ZONING

The Property and the surrounding properties are zoned R-5 Single-Family Residential. To the West, one block over, properties are zoned R-6 Single-Family Attached Residential, which permits the attached dwelling use. Additionally, to the southwest are properties zoned B-1 Neighborhood Business.

MASTER PLAN DESIGNATION

The Richmond 300 Master Plan (the “Master Plan”) suggests “Neighborhood Mixed-Use” for the Property. The Master Plan describes this land use designation as “existing or new highly-walkable urban neighborhoods that are predominantly residential with a small, but critical, percentage of parcels providing retail, office, personal service, and institutional uses.” Recommended development styles are described as featuring “a variety of building types that are close to one another and create a unified street wall. The building size, density, and zoning districts for these areas vary depending on historical densities and neighborhood characteristics. Single-family, two-family, and small multi-family buildings are contemplated as the primary uses in these areas.”

In addition to the Property-specific guidance offered by the Vision and Core Concepts chapter, there are a number of other goals elsewhere within the Master Plan that support this request:

- Page 109 (Equitable Transportation Chapter), Objective 6.1 to “Increase the number of residents and jobs at Nodes and along enhanced transit corridors in a land development pattern that prioritizes multi-modal transportation options.”
 - b. Develop housing at all income levels in and near Nodes and along major corridors (see strategies Goal 14).
- Page 136 (Diverse Economy Chapter), Objective 11.1 to “Increase the areas of appropriately zoned land near various transportation modes and housing to retain, create, and attract employers.”
 - d. Encourage the development of a variety of quality housing types to house employees across the economic spectrum (see Goal 14).
- Page 150 (Inclusive Housing Chapter), Objective 14.1 to “Increase city-wide awareness of the importance of integrating housing at all income levels into every residential neighborhood so every household has housing choice throughout the city.”
- Page 152 (Inclusive Housing Chapter) (see map on p. 153), Objective 14.4 to “Increase the number of mixed-income communities along enhanced transit corridors.”
- Page 152 (Inclusive Housing Chapter) (see map on p. 153), Objective 14.5 to “Encourage more housing types throughout the city and greater density along enhanced transit corridors and at Nodes (shown in Figure 38 [p.153]) by amending the Zoning Ordinance. “

- e) Allow the development of middle housing (2- to 4- unit buildings) by-right within 1/2 mile of high-frequency transit stops.
- Page 155 (Inclusive Housing Chapter), Objective 14.8 to “Develop inclusionary and equitable housing options for our gentrifying neighborhoods to prevent involuntary displacement.”
- Page 159 (Thriving Environment Chapter) Objective 15.1 to “Reduce air pollution related to transportation.”
 - a. Increase the number of Richmonders living in a development pattern that encourages density and reduces dependency on single-occupancy vehicles (see Goal 1, Goal 8, Goal 14).
- Page 86 (High-Quality Places Chapter), Objective 1.4, to “maintain and improve primarily residential areas by increasing their linkages to...corridors...and maintaining high-quality design standards.”
- Page 100 (High Quality Places Chapter), Objective 4.1, to “create and preserve high-quality, distinctive, and well-designed neighborhoods and nodes throughout the City,” as the request introduces thoughtfully designed new construction in a manner not otherwise assured by-right.

Proposal

PROJECT SUMMARY

The applicant is proposing to construct two new, single-family attached dwellings, consistent with the development pattern in the area.

PURPOSE OF REQUEST

The Property consists of a single lot of record and is 50 feet wide and contains roughly 6,031 square feet of lot area. The owner is proposing to remove the existing dwelling on the Property and divide the lot in order to build two new single-family attached dwellings. While the single-family use is permitted by the underlying R-5 Single-Family Residential District, the attached use is not permitted and, therefore, a SUP is required. Were this property located one block to the west on N 33rd Street, the proposed development would meet all underlying zoning regulations and be permissible by-right.

In exchange for the SUP, the intent of this request is to ensure the development of two high-quality single-family dwellings. The overall project will remain respectful to the historic development pattern in the vicinity thereby remaining consistent with the predominant character of the area. Also, the quality assurances conditioned through the SUP will guarantee a higher quality development and better neighborhood compatibility than might otherwise be guaranteed with a by right development.

PROJECT DETAILS/DESIGN

When complete, the proposed dwellings would each be two stories in height. They would each include approximately 1,804 square feet of finished floor area and consist of three

bedrooms and two-and-one-half bathrooms. The proposed first-floor plans are modern, open, and efficient and are designed to meet the needs of the market. The second-floor plans include a primary bedroom with en-suite bathroom and walk-in closet along with two additional bedrooms which share a jack-and-jill bathroom.

The new dwellings would be of frame construction and clad in quality building materials including cementitious lap siding in order to ensure durability. A full-width front porch on each dwelling would engage the street and provide usable outdoor living space. The proposed dwellings massing, and architectural styles are designed to be compatible with nearby dwellings and are consistent with the historical homes found in the neighborhood.

Findings of Fact

The following are factors included in Section 17.11 of the Charter and Section 30-1050.1 of the Zoning Ordinance relative to the approval of special use permits by City Council. The proposed special use permit will not:

- ***Be detrimental to the safety, health, morals and general welfare of the community involved.***

The proposed SUP will not impact the safety, health, morals and general welfare of the nearby neighborhoods. The proposed site improvements and density are compatible with the existing development in the vicinity. This request would simply permit the efficient utilization of the Property by allowing for new development to occur. The improvement of the Property in conjunction with the high quality/benefits provided by the SUP will provide positive impacts in terms of health, welfare, etc., and furthermore will add to the vibrancy of the neighborhood.

- ***Tend to create congestion in streets, roads, alleys and other public ways and places in the area involved.***

The proposed SUP will not result in significant traffic impacts to nearby residential neighborhoods. The traffic generation for two additional dwelling units would be negligible, especially within the context of a walkable neighborhood. As such, the SUP will not create congestion on streets, roads, alleys or any other public right of way.

- ***Create hazards from fire, panic or other dangers.***

The Property will be developed in a manner consistent with the requirements of the building code and in accordance with the requirements of Fire and Emergency Services. The City's codes applicable to this development are designed to eliminate such hazards.

- ***Tend to overcrowding of land and cause an undue concentration of population.***

The SUP will not tend to overcrowd the land or create an undue concentration of population.

- ***Adversely affect or interfere with public or private schools, parks, playgrounds, water supplies, sewage disposal, transportation or other public requirements, conveniences and improvements.***

The SUP would not adversely affect the above referenced City services. To the contrary, the proposal would provide positive fiscal (tax) benefits that would enhance the City's ability to provide these services to the proposed development.

- ***Interfere with adequate light and air.***

The light and air available to the subject and adjacent properties will not be affected. The massing of the proposed structures is similar to what the underlying zoning district and feature regulations applicable to single-family detached dwellings allow for by-right on legally nonconforming lots of substandard width.

Summary

In summary we are enthusiastically seeking approval for the construction of two new, single-family attached dwellings on the Property. The SUP represents an ideal, small-scale urban infill development for this location. In exchange for the SUP, the quality assurances conditioned therein would guarantee the construction of quality housing opportunities consistent with Master Plan guidance. This would contribute to the overall vibrancy of the block through the provision of an appropriate urban form and use that is consistent with the development pattern and surrounding neighborhood.
