****Owner must sign at the bottom of this page******Acknowledgement of Responsibility**

Compliance: If granted, you agree to comply with all conditions of the certificate of appropriateness (COA). Revisions to approved work require staff review and may require a new application and approval from the Commission of Architectural Review (CAR). Failure to comply with the conditions of the COA may result in project delays or legal action. The COA is valid for one (1) year and may be extended for an additional year, upon written request and payment of associated fee.

Requirements: A complete application includes all applicable information requested on checklists available on the CAR website to provide a complete and accurate description of existing and proposed conditions, as well as payments of the application fee. Applications proposing major new construction, including additions, should meet with staff to review the application and requirements prior to submitting. Owner contact information and signature is required. Late or incomplete applications will not be considered.

Zoning Requirements: Prior to Commission review, it is the responsibility of the applicant to determine if zoning approval is required. Application materials should be prepared in compliance with zoning.

Property Owner Signature: _____

APPLICANT'S STATEMENT

This application amends a portion of the approved Certificate of Appropriateness COA-098251-2021 (the "COA") following the unanticipated demolition of two 1-story commercial storefronts. The scope of the amendment is the façade and an extension of the reconstructed brick masonry extending eight feet into the commercial bays, with approximately 4 feet on the west wall of the former 3304 E. Marshall property and approximately 11 feet on the east wall of the former 3306 E. Marshall property visible to the right of way (the "Amendment Section") pursuant to the plans prepared by ADO/Architecture Design Office, entitled "3302-3308 E Marshall St. Richmond, VA 23223" and dated October 6, 2023 (the "Plans"). The Applicant has extensive photographic evidence and scanned dimensions of the Amendment Section and has used this information in the Plans for the portions of the storefronts that were to be restored in the COA.

The Amendment Section was previously included in the COA as limited masonry restoration framed awning and parapet trim and the replacement of the parapet, aluminum storefront, storefront windows, doors and bulkhead. The Amendment Section proposed with this application is reconstruction of the masonry identified as (1) and (9) on sheet 05 of the Plans. It is noted that the brick was heavily painted during the COA application and many of the bricks not in a condition to use for reconstruction. The Amendment Section proposes to construct the masonry wall and piers to match that of the demolished masonry. The parapet trim is identified as (3) on the Plans and is proposed as metal with drip edges as shown on sheet 06 of the Plans. The new framed awning is identified as (4) on the Plans and would have required reconstruction based on the framing condition, and the new metal roof on the awning is the same as included in the COA. The remaining components of the Amendment Section as are described in the COA. New storefronts, recessed entry doors and sills and windows are to be installed as shown on sheet 05 of the Plans and as was provided in the COA. The new cementitious faced bulkhead as shown on sheet 06 of the Plans is also as provided in the COA.

This application is limited to the Amendment Section, but we have included for reference and informational purposes, additional sheets in the Plans to provide the details of the new construction, internal configuration of the commercial space and demolition of the portions of the commercial buildings to accommodate the now internal courtyard, all as provided in the COA.
