Acknowledgement of Responsibility

Compliance: If granted, you agree to comply with all conditions of the certificate of appropriateness (COA). Revisions to approved work require staff review and may require a new application and approval from the Commission of Architectural Review (CAR). Failure to comply with the conditions of the COA may result in project delays or legal action. The COA is valid for one (1) year and may be extended for an additional year, upon written request and payment of associated fee.

Requirements: A complete application includes all applicable information requested on checklists available on the CAR website to provide a complete and accurate description of existing and proposed conditions, as well as payments of the application fee. Applications proposing major new construction, including additions, should meet with staff to review the application and requirements prior to submitting. Owner contact information and signature is required. Late or incomplete applications will not be considered.

Zoning Requirements: Prior to Commission review, it is the responsibility of the applicant to determine if zoning approval is required. Application materials should be prepared in compliance with zoning.

Property Owner Signature: _____

CERTIFICATE OF APPROPRIATENESS

ALTERATION AND ADDITION CHECKLIST

Well in advance of the COA application deadline contact staff to discuss your project, and if necessary, to make an appointment to meet with staff for a project consultation.

Complete all applicable sections and submit with the COA application form. Staff can assist you in determining what items are required for your scope of work. An incomplete application may cause delays in processing or may be deferred to the next agenda. Application materials must clearly represent current and proposed conditions. Refer to Standards for Rehabilitation outlined in Section 30.930.7(b) of the City Code, as well as, the *Richmond Old and Historic Districts Handbook and Design Review Guidelines*.

CITY OF RICHMOND CERTIFICATE OF APPROPRIATENESS

ALTERATION AND ADDITION CHECKLIST DETAILS

---WRITTEN DESCRIPTION---

PROPERTY ADDRESS:

4107 Hermitage Road

Richmond, VA 23227

BUILDING TYPE:

Single-family residence garage

ALTERATION TYPE:

Roof replacement

PROPERTY DESCRIPTION:

Existing stucco English Tudor with half-timbered front face 20' x 20' detached garage circa 1930. Note that this garage also includes a rearward 20' x 28' addition (circa 1970's we believe) clad with horizontal siding located near the rear lot line. While the gable wall and garage doors face Hermitage Road, the garage structure is setback approximately 151 feet from the Hermitage Road right of way line. Due to this significant setback and due to the lot's grade rises from Hermitage Road, combined with the existing houses and landscaping fronting Hermitage Road, the garage roof is difficult to see from Hermitage Road.

PROPOSED WORK:

Proposed demolition and structural work includes removing the existing asphalt shingles, eve and rake trim, flashing, and underlayment to the original sheathing. Additional structural repairs include replacing sheathing as necessary and realigning the rafters and sheathing between the rear of the garage and the beginning of the addition as necessary to remove the slight "bump" in the roof line between the existing roof and the addition and bring the two roof lines to one consistent plane. Note no proposed changes will be made to either the roof height and or roof pitch.

CURRENT BUILDING MATERIAL CONDITIONS:

Existing roof is failing/deteriorating brick red asphalt shingles assumed to be 30 years old. At this time, it is unknown as to the material type of the original garage roof construction.

PROPOSED NEW MATERIAL DESCRIPTION:

Proposed roof replacement includes:

- To remove existing roofing down to decking and haul from premises
- To adhere Carlisle WIP 300 or equivalent High Temperature underlayment in preparation for roofing
- To install VMZINC® QUARTZ-ZINC .7mm custom formed drip edge at eaves and rakes
- To install VMZINC® QUARTZ-ZINC .7mm roofing panels, panels run from coil onsite
- Panel width to be roughly 16" wide, run continuously from ridge to eave
- Panel standing seam height to be roughly 1"
- Ridge to be hand folded and hand hammered in traditional fashion with traditional tools
- New roof to come with contractor's 10 year warranty on labor and craftsmanship
