## Introduction

The property owner is requesting a special use permit (the "SUP") for 3102 P Street (the "Property"). The SUP would authorize the construction of one two-family detached dwelling (a "duplex") which, while permitted by the underlying R-6 Single-Family Attached Residential district zoning, does not meet some of the feature requirements applicable to the Property.

## Existing Conditions

### SITE DESCRIPTION AND EXISTING LAND USE

The Property is located on the northern line of P Street between N 31<sup>st</sup> and N 32<sup>nd</sup> Streets and is referenced by the City Assessor as tax parcel E000-0723/028. The Property is approximately 33 feet wide by 100 feet deep and contains approximately 3,300 square feet of lot area and is currently vacant. Access is provided by means of an east-west alley located to the rear of the Property.

The properties in the area contain a range of uses, forms and materials. Within the 3100-block of P Street are predominately single-family, two-story dwellings of a range of forms, as well as the Fountain Baptist Church located at the corner of P and N 32<sup>nd</sup> Streets. Within the immediately

adjacent blocks can be found single- and two-family dwellings as well as a large multifamily development.

## **EXISTING ZONING**

The Property and those nearby are zoned R-6 Single-Family Attached Residential which permits the proposed two-family use. To the southeast, across P and N 31<sup>st</sup> Street, lies a R-48 Multifamily Residential District. Further east, across N 30<sup>th</sup> Street lies a B-2 Business District.

## **TRANSPORTATION**

Located 400 feet from the Property, less than a two-minute walk, is the 31<sup>st</sup> and O Street bus stop which serves the 12 bus line which runs every 30 minutes and connects with the Pulse BRT providing connectivity throughout the City. The Property is also located .6 miles from the 7 bus line which runs every thirty minutes.

## **MASTER PLAN DESIGNATION**

The Richmond 300 Master Plan (the “Master Plan”) suggests “Neighborhood Mixed-Use” for the Property. This land use category is described as “existing or new highly-walkable urban neighborhoods that are predominantly residential.” The Master Plan suggests this future land use designation allow for a variety of housing types that are consistent with the scale, density, and design of what exists in the vicinity. Two-family dwellings are a primary use in the Neighborhood Mixed-Use designations which also encourages that developments reinforce a gridded street pattern to increase connectivity. Single-family dwellings are the contemplated primary use in the Residential future land use designation (p. 54).

The Property is also located roughly 500 feet from the Micro Node centered at Oakwood Avenue and P Street. Nodes are described as “places in Richmond that can... accommodate additional growth in jobs and population” and Micro Nodes are specifically described as “A notable place within a neighborhood that generally provides goods and services to the immediate residents but may attract visitors.”

31<sup>st</sup> and P Streets are also both described by the Richmond 300 Master Plan as “Major Mixed-Use Streets” which are described as “carry[ing] high volumes of vehicles, pedestrians, and bicycles, through commercial and mixed-use areas.”

In addition to the Property-specific guidance offered by the Vision and Core Concepts chapter, there are a number of other goals elsewhere within the Master Plan that support this request:

- Page 109 (Equitable Transportation Chapter), Objective 6.1 to “Increase the number of residents and jobs at Nodes and along enhanced transit corridors in a land development pattern that prioritizes multi-modal transportation options.”
  - b. Develop housing at all income levels in and near Nodes and along major corridors (see strategies Goal 14).

- Page 136 (Diverse Economy Chapter), Objective 11.1 to “Increase the areas of appropriately zoned land near various transportation modes and housing to retain, create, and attract employers.”
  - d. Encourage the development of a variety of quality housing types to house employees across the economic spectrum (see Goal 14).
- Page 159 (Thriving Environment Chapter) Objective 15.1 to “Reduce air pollution related to transportation.”
  - a. Increase the number of Richmonders living in a development pattern that encourages density and reduces dependency on single-occupancy vehicles (see Goal 1, Goal 8, Goal 14).
- Page 86 (High-Quality Places Chapter), Objective 1.4, to “maintain and improve primarily residential areas by increasing their linkages to...corridors...and maintaining high-quality design standards”
- Page 100 (High Quality Places Chapter), Objective 4.1, to “create and preserve high-quality, distinctive, and well-designed neighborhoods and nodes throughout the City,” as the request introduces thoughtfully designed new construction in a manner not otherwise assured by-right.

## Proposal

### PROJECT SUMMARY

The proposed development includes the construction of one two-family detached dwelling on the currently vacant parcel.

### PURPOSE OF REQUEST

The subject Property is a single legal lot of record and has a lot width of roughly 33 feet along P Street where residential lots are generally 33 to 16 feet in width and contains approximately 3,300 square feet of lot area. The applicant would like to construct a two-family detached dwelling on the parcel. While the proposed two-family use is permitted by the underlying R-6 district, like every other residential parcel in the block, the Property does not meet the required lot width and/or lot area and therefore, the SUP is required.

In exchange for the SUP, this request will better ensure a high-quality market rate infill development. The overall project would be appropriately dense and efficient while remaining consistent with the use permitted by-right by the underlying zoning. At the same time, the quality assurances conditioned through the SUP would guarantee a higher quality development than might otherwise be developed by right.

### PROJECT DETAILS

The new two-family detached dwelling would be two stories in height and is intended to be consistent with the historic development pattern found throughout the neighborhood. The units would be configured as flats and each would contain two bedrooms and two and a half bathrooms.

Both units would consist of approximately 1,313 square feet of floor area and have been designed to meet the needs of the market. The exterior design would be traditional in style and would be consistent with the character of the area. The building would be designed with a single entrance on the front facade to have the appearance of a single-family detached dwelling from the street.

The new dwelling would be clad in quality building materials including cementitious lap siding in order to ensure durability. A front porch would engage the street and provide usable outdoor living space. The building's massing and architectural style is designed to be compatible with nearby dwellings and is consistent with the historical homes found in the neighborhood.

## Findings of Fact

The following are factors included in Section 17.11 of the Charter and Section 30-1050.1 of the Zoning Ordinance relative to the approval of special use permits by City Council. The proposed special use permit will not:

- ***Be detrimental to the safety, health, morals and general welfare of the community involved.***

The proposed special use permit for high-quality conversion of the existing dwelling will not impact the safety, health, morals and general welfare of the nearby neighborhoods.

- ***Tend to create congestion in streets, roads, alleys and other public ways and places in the area involved.***

The proposed special use permit will not result in significant traffic impacts to nearby residential neighborhoods. The negligible traffic generation related to the proposed dwelling will result in no congestion on streets, roads, alleys or any other public right of way.

- ***Create hazards from fire, panic or other dangers.***

The Property will be developed in a manner consistent with the requirements of the building code and in accordance with the requirements of Fire and Emergency Services. The City's codes applicable to this development are designed to eliminate such hazards.

- ***Tend to overcrowding of land and cause an undue concentration of population.***

The proposed special use permit is consistent with the historical lot pattern and density in the vicinity and will not tend to over crowd the land or create an undue concentration of population.

- ***Adversely affect or interfere with public or private schools, parks, playgrounds, water supplies, sewage disposal, transportation or other public requirements, conveniences and improvements.***

The special use permit would not adversely affect the above referenced City services. To the contrary, the proposal would provide positive fiscal (tax) benefits that would enhance the City's ability to provide these services to the proposed development.

- ***Interfere with adequate light and air.***

The light and air available to the subject and adjacent properties will not be affected. The proposed buildings are of compatible massing and spacing to the existing dwellings in the vicinity, which are in many cases attached. Required setbacks between buildings will be met. The proposed development will not interfere with the provision of adequate light and air to the adjacent buildings.

## Summary

In summary, we are enthusiastically seeking approval for the construction of the proposed two-family detached dwelling. The building has been thoughtfully designed in order to provide appropriate, high-quality, infill residential development. The request offers compatibility with the City's Master Plan in terms of use. The request would upgrade the Property while maintaining a desirable variation in housing style and type in the vicinity. The traditional building form would provide the much-desired traditional neighborhood design which is appropriate to this area of the City. Finally, the quality assurances conditioned through the SUP would guarantee a higher quality development than might otherwise be developed by right.
