RE: To accept and appropriate grant funds from the Virginia Opioid Abatement Authority in the total amount of \$178,170.00 for the purposes of creating a resource map in collaboration with Henrico County that supports the City’s efforts to combat the opioid crisis.

ORD. OR RES. No.

PURPOSE: To authorize the Chief Administrative Officer to accept funds in the total amount of \$178,170.00 from the Virginia Opioid Abatement Authority, and to amend the Fiscal Year 2024-2025 Special Fund Budget, by creating a new special fund for the Department of Neighborhood and Community Services called the OAA Resource Mapping Project Special Fund, and to appropriate the increase to the Fiscal Year 2025 Special Fund Budget by increasing estimated revenues and the amount appropriated to the Department of Neighborhood and Community Services’ OAA Resource Mapping Project Special Fund for the purpose of creating a resource map in collaboration with Henrico County that supports the City’s efforts to combat the opioid crisis.

BACKGROUND: Virginia’s Opioid Abatement Authority is an independent body, the purpose of which is to abate and remediate the opioid epidemic in the Commonwealth through financial support

from the Fund, in the form of grants, donations, or other assistance, for efforts to treat, prevent, and reduce opioid use disorder and the misuse of opioids in the Commonwealth. The Virginia Opioid Abatement Authority (VOAA) has an annual application cycle that includes a competitive grant opportunity for proposals involving collaborations between two or more localities. During this cycle, the City of Richmond submitted a cooperative project proposal with Henrico County. The City will serve as the lead applicant and fiscal agent. On May 31, 2024, the City of Richmond was notified by the VOAA that the cooperative project proposed by the City and Henrico was approved with a total funding amount of \$183,170. The City's proposal was chosen and developed in direct partnership with stakeholders from Henrico County and the Richmond Opioid Task Force. The Richmond Opioid Task Force is composed of internal, quasi-government, non-profit partners as well as subject matter experts including representation from Henrico County and the Richmond Henrico Health District.

As part of the award conditions, the City of Richmond and Henrico County must have a written memorandum of understanding or contract by which the implementing organization agrees to comply with all applicable grant terms, conditions, and assurances. This ordinance authorizes acceptance of \$178,170.00 in cooperative funds from the VOAA which includes \$173,170.00 of competitive grant funds and \$5,000.00 from the City's VOAA Gold Standard Incentive allocation. An additional \$5,000 of funding from Henrico County will be accepted via a separate ordinance.

This project will build on the efforts of the "Implementing Opioid Strategies at the Local Level" (IOPSLL) grant held by the Richmond Henrico Health District from the National Association of County and City Health Officials for a Resource Mapping project. The IOPSLL grant allowed RHHD to hire a team of resource mapping specialists to develop a comprehensive listing of substance use disorder resources in the City of Richmond and Henrico County. The project awarded to the City of Richmond by the VOAA will build on these efforts by ensuring the maintenance and continued monitoring of the guide as well as development of a user-friendly website, data dashboard, and related tools for public access.

With adoption of this ordinance, the Administration will ensure that all funds will go toward approved

uses in compliance with the National Opioid Settlement and the Virginia Opioid Abatement Authority. Investing in a resource mapping website is an evidenced based approach to opioid remediation. This grant from the Virginia Opioid Abatement Authority will fully cover all costs associated with the project as approved by the VOAA. Additionally, adoption of this ordinance approves all tasks associated with the appropriation of these funds.

COMMUNITY ENGAGEMENT: This proposal was informed by significant stakeholder engagement and developed with direct input and support from external agencies and subject matter experts on the Richmond Opioid Task Force.

STRATEGIC INITIATIVES AND OTHER GOVERNMENTAL: RES. 2022-R013 declaring opioid drug overdose deaths as a public health crisis in the City of Richmond; Richmond Opioid Task Force.

FISCAL IMPACT: This award is from the Virginia Opioid Abatement Authority in the total amount of \$178,170.00. This will increase the Special Fund Budget by \$178,170.00. There is no city match requirement.

Dear Mr. Barrett,

As Chairman of the Virginia Opioid Abatement Authority (OAA) I am pleased to inform you that The City of Richmond, acting as fiscal agent on behalf of itself, Henrico County, has been awarded a Cooperative Partnership grant in the amount of \$173,170.00 to support its Resource Mapping of Substance Use Related Resources project.

Included in this award are Individual Distribution and/or Gold Standard Incentive awards pledged as a match to this project for the following localities: The City of Richmond - \$5,000.00; Henrico County - \$5,000.00. The total award amount for this project is \$183,170.00.

The OAA Board of Directors has invested considerable time and effort to ensure that Virginia allocates its share of the national opioid settlements in a manner that saves lives, restores families, and safeguards communities. This is a major challenge and will require a strengthening of partnerships between community-based organizations, local governments, state agencies, and many other stakeholders. Efforts such as the Resource Mapping of Substance Use Related Resources project have the potential to exemplify how we can work together to turn the tide of the opioid crisis in Virginia.

Details about the award being offered by the OAA are attached to this letter. We look forward to receiving your acceptance and to working together on this important mission.

Sincerely,

RESOURCE MAPPING WEBSITE

NARRATIVE SECTIONS

b. Provide a brief narrative description of the proposed project.

In 2023 the Richmond Henrico Health District (RHHD) received a onetime “Implementing Opioid Strategies at the Local Level” (IOPSL) grant from the National Association of County and City Health Officials for a Resource Mapping project. The project is focused on the creation of a comprehensive guide of substance use-related resources across the region.

The grant has supported RHHD to hire a team of resource mapping specialists to develop the guide. The team has used evidence-based research to craft this guide. The project is documenting the landscape of resources and support informed linkages to care by compiling a comprehensive listing of SUD based resources in Richmond and Henrico. This guide will be a tool that assists in linkage to care and resource navigation. This tool will be utilized by direct service providers and other professionals such as peer-resource navigators and community health workers that serve as advocates for residents in connecting to care. This guide is also a tool for service providers and subject matter experts. The resource guide will include information on mental and behavioral health services, harm reduction programs, SUD treatment facilities, Medication Assisted Treatment/Medication for Opioid Use Disorder; outpatient, inpatient, and residential facilities; AA, NA, and SMART meetings; and sober living, housing, and recovery homes.

By June of 2024 that project will be complete. This proposal seeks to build on these efforts. Resource mapping guides and resource mapping efforts are often ineffective or quickly become obsolete because they lack staff capacity to support the project, lack a solidified and efficient process to maintain the guide, and lack a website and other tools to ensure accessibility and usability. Additionally, this resource guide – like many other similar efforts – is likely to result in an extremely long and comprehensive document that may be an imperfect tool for some uses and difficult to navigate for some users. Building on lessons learned, we desire to provide expert staff support to ensure the maintenance and continued monitoring of the guide as well oversee development of a user-friendly website, data dashboard, and related tools. This will ensure that individuals and stakeholders can meaningfully navigate an accurate representation of available services and resources and that there are continued, real-time discussions on strategies to most effectively route individuals to appropriate and meaningful care and resources.

This proposal has two key phases/components:

Phase 1

Review and Planning

- A Project Manager hired by the City of Richmond with grant funds will lead a review and planning process with Henrico County, City of Richmond, Richmond Henrico Health District, and key stakeholders and subject matter experts.
- Together the group will:
 - Review the Resource Guide and identify any additional resources or components that may need further development.

- Further develop and structure the Resource Guide for public consumption (website, collateral, etc.). This convening may be rooted in the already existing Richmond and Henrico Opioid taskforces.
- Identify data sources and develop a plan for hosting a data dashboard to complement the Resource Guide. Data sources can include state and local level public health data, and data from a key cohort of partners such as: service providers, local CSBs, police and ambulance authorities. etc. These providers can regularly share appropriate, relevant aggregated programmatic data.
- Develop a plan for identifying services and resources listed within the guide that meet best practices and appropriate accreditation standards.
- Identify components of the resource guide that should be designed and formatted as print and web-friendly infographics, one-pagers, and presentations specific to key audiences or service areas.
- Create a plan for website development including considerations for how the site will interface with any locality-specific OUD and SUD websites and resources while ensuring the site can be easily utilized by the general public as well as service providers.

Phase 2

- Website Development
- One-pager/infographics design
- Regular stakeholder outreach and resource scanning begins to ensure the guide is updated before launch and remains updated.
- Soft launch of website with resource guide, data dashboard, and user-friendly one-pagers, presentations, infographics, etc.
- Hard launch of website with outreach campaign to raise awareness among key stakeholder groups
- Road map and timeline developed for engaging agencies offering client-focused navigation to help stakeholders and individuals use the resources to find out where they best plug in or seek treatment/help when need.
- City of Richmond, Henrico County, and RHHD make determination about options to expand including:
 - Possible application to fund pilot to hire Social Worker to provide 1-on-1 navigation of Resource Guide to individuals in need of support
 - Possible expansion to include other localities

c. What is the strategy for long-term sustainability once OAA funds are reduced or no longer available?

-Ongoing maintenance of the guide will be significantly cheaper and less intensive than the initial development.

-Effective use of the resource guide will significantly reduce the cost burden of OUD and SUD in our communities.

-As utilization of the website and resources increase upon launch, we believe localities and other stakeholders will see that the return on investment warrants ongoing investment.

List and describe the objectives of this project.

1	Develop -and maintain with staff support - a space for regional resources (guide, website tools, and data dashboard) to address current gaps in care and resource navigation
2	Engage a diverse cross sector of partners, stakeholders and subject matter experts in the development of the shared website, guide, and related tools and ensure the resource guide and supporting website and complementary tools are developed in a way that could allow a trained navigator to use them to guide individuals to care in future project phases.
3	Development of a Data Dashboard to represent important aggregated data in one location.

g. How was the need determined and how does that need relate to abatement?

Opioid overdose rates have skyrocketed in Richmond over the past four years, with the risk of overdose growing most significantly among Black drug users in Richmond (fatal opioid overdoses increase from 38.9 per 100,000 in 2018 to 102.1 in 2021; for Black residents, 38.1 in 2018 to 146.0 in 2021). Henrico County has also seen an increase: from 16.4 per 100,000 in 2018 to 38.1 per 100,000 in 2021. Racial disparities are less prominent in Henrico, with 2021 race-specific rates of 43.4 and 46.2 per 100,000, for White and Black residents, respectively.

The City of Richmond and neighboring Henrico County comprise a substantial proportion of the urban center of Central Virginia, with a growing population of 232,226 and 333,766 residents, respectively. As of 2020, 46.3% of Richmond residents identify as Black; 43.4% identify as White; and 7.5% identify as Hispanic/Latinx. In Henrico 52.6% of residents identified as White; 31.1% as Black; and 6.1% identified as Hispanic/Latinx. Although two distinct localities, Richmond City and Henrico County have fluid borders — the same factors that impact Richmond similarly impact communities in Henrico. Currently, 21.0% of Richmond residents (8.8% in Henrico) live below the federal poverty level, including 33% of all children (12.8% in Henrico). Concentrated intergenerational poverty and systemic marginalization disproportionately impacts Black residents in both localities.

This above data is an important context to understand the need for innovative projects to address the increased opioid overdose rates over the past 4 years. There continues to be a disconnect in communities being able to be informed about OUD services that are available and how to get connected to those resources.

The Richmond Henrico Health District, our local public health experts, have worked on two projects through a NACCHO grant called Implementing Opioid Prevention Strategies at the Local Level (IOPSSL). The first project focused on Community Conversations. This project focused on qualitative data collected through a Resident Led Community Conversation Education Campaign. By systematically collecting qualitative data from our residents, they gained insight on how this crisis has impacted communities. They also learned more about how difficult it is to access care and what supports or

resources are most useful to help community members avoid overdose, access treatment, and maintain recovery.

To support that community need, the second project focused on the development of an internal SUD related Community Resource Guide. This guide outlines in one space, a comprehensive listing of SUD resources in the City of Richmond and Henrico. The guide is designed to be a resource for service providers, direct care professionals such as PRS, Social Workers and CHWs as well as residents.

As the project advanced in recent months, Henrico and Richmond saw both the incredible potential of this guide and the clear limitations and lost opportunities if staff and resources were not allocated to sustain the guide, expand the resources, include a data dashboard, and ensure accessibility and usability. Leadership from both localities’ Task Forces identified the project as a priority to pursue as a collaborative proposal.

i. Is there a specific group of individuals this project is designed to reach, and how many individuals are expected to participate per year?

This project has two primary audiences. The ultimate goal is to reach individuals experiencing - or at risk of experiencing - Opioid Use Disorder and co-occurring conditions. To that end, an intermediate audience is the service providers we want to engage in the ongoing development and use of the guide and whose resources we seek to map. These include: mental and behavioral health services, harm reduction programs, SUD treatment facilities, Medication Assisted Treatment/Medication for Opioid Use Disorder; outpatient, inpatient, and residential facilities; AA, NA, and SMART meetings; and sober living, housing, and recovery homes.

At least 40 individuals representing key stakeholder groups will be engaged.

At least 500 adults from the general public will access the website in the first 6 months after launching.
