Introduction

The property owner is requesting a special use permit (the "SUP") for 1219 N 31st Street (the "Property"). The SUP would authorize the construction of one (1) single-family detached dwelling, some of the features of which do not conform to the underlying R-6 Single-Family Attached Residential district zoning requirements applicable to the Property.

Existing Conditions

SITE DESCRIPTION AND EXISTING LAND USE

The Property is located on the eastern side of North 31st Street between Q and S Streets. The Property is referenced by the City Assessor as tax parcel E000-0721/029. The Property is roughly 22 feet wide by 124 feet in depth and contains approximately 2,727 square feet of lot area. Access is provided at the rear of the Property by means of a north-south alley.

Properties in the area consist of a range of uses. Along with single- and two-family dwellings, within two blocks of the Property multifamily, commercial, institutional, and government uses can be found.

EXISTING ZONING

The Property and those surrounding it are currently zoned R-6 Single-Family Attached. To the north, across T Street, and east, across N 33rd Street can be found properties within the R-5 District. Southwest of

the Property, at the intersection of Q and N 30th Streets are properties located within the B-2 Business District.

TRANSPORTATION

The Property is located within a half mile of GRTC bus stops which serve the 7, 12, and 13 bus routes providing access to Church Hill and connections to the GRTC bus system. Two blocks to the west, N 29th Street is described as a "Bike-Walk Street" and provides north-south connection from Libby Hill Park to the Peter-Paul Neighborhood.

MASTER PLAN DESIGNATION

The Richmond 300 Master Plan (the "Master Plan") suggests "Neighborhood Mixed-Use" for the Property. This land use category is described as "existing or new highly-walkable urban neighborhoods that are predominantly residential." The Master Plan suggests this future land use designation allow for a variety of housing types that are consistent with the scale, density, and design of what exists in the vicinity. Single-family dwellings are a primary use in the Neighborhood Mixed-Use designations which also encourages that developments reinforce a gridded street pattern to increase connectivity.

In addition to the Property-specific guidance offered by the Vision and Core Concepts chapter, there are a number of other goals elsewhere within the Master Plan that support this request, including:

- Equitable Transportation, Objective 6.1, which is to "increase the number of residents...at nodes and along enhanced transit corridors"
- High-Quality Places, Objective 1.4, to "maintain and improve primarily residential areas by increasing their linkages to...corridors...and maintaining high-quality design standards"
- High Quality Places, Objective 4.1, to "create and preserve high-quality, distinctive, and well-designed neighborhoods and nodes throughout the City," as the request introduces thoughtfully-designed new construction in a manner not otherwise assured by-right.
- Inclusive Housing chapter, Objective 14.5, to "encourage more housing types throughout the City and greater density...at nodes...", as the request is a more efficient use of the Property than could be achieved by-right in the R-6 zoning district.

Proposal

PROJECT SUMMARY

The proposed development includes the construction of one (1) new, single-family detached dwelling on the vacant Property.

PURPOSE OF REQUEST

The SUP would permit the construction of a new, single-family detached dwelling. The new dwelling would be located on the existing parcel which is 22 feet in width and contains roughly 2,727 square feet of lot area. While it is a legal lot of record, it does not meet the current R-6 lot area and width requirements. All other aspects of the underlying zoning requirements, including the requirement that off-street parking be provided, would be met.

PROJECT DETAILS

The proposed dwelling would be three stories in height and is consistent with the historic development pattern, which includes a variety of architectural styles. The third floor would be set back and the building design would utilize a false mansard roof at the second story in order to achieve the appearance of a two-story building from the street. This design has been utilized elsewhere in the vicinity and is planned for the abutting by-right construction at 1221 and 1221 ½ N 31st Street. The dwelling would include approximately 2,068 square feet of finished floor area and consist of three bedrooms and two-and-one half bathrooms. The proposed floor plans are modern and efficient and designed to meet the needs of families in today's market. The dwelling has been designed with a floorplan which offers a modern and open living area and kitchen on the first floor. Two bedrooms and a full bathroom will be located on the second floor. The third floor is stepped back to allow for a forward-facing outdoor terrace which is accessible from an interior loft. The primary bedroom will be located at the rear of the third floor and will contain a large closet and en-suite bathroom.

The new dwelling would be clad in cementitious lap siding in order to ensure quality and consistency in appearance with many other dwellings in the vicinity. A full width front porch and a roof deck is included in the design and would provide additional outdoor living space for the occupants. An off-street parking space is proposed for the dwelling which will be accessible from the rear alley.

Findings of Fact

The following are factors indicted in Section 17.11 of the Charter and Section 114-1050.1 of the Zoning Ordinance relative to the approval of special use permits by City Council. The proposed special use permit will not:

- ***Be detrimental to the safety, health, morals and general welfare of the community involved.***

The proposed special use permit will not impact the safety, health, morals and general welfare of the nearby neighborhoods.

- ***Tend to create congestion in streets, roads, alleys and other public ways and places in the area involved.***

The proposed special use permit will not result in significant traffic impacts to nearby residential neighborhoods. The proposed residential use would be limited in size, type and scale to avoid any traffic or parking concerns.

- ***Create hazards from fire, panic or other dangers.***

The property will be developed in a manner consistent with the requirements of the building code and in accordance with the requirements of Fire and Emergency Services. The City's codes applicable to this development are designed to eliminate such hazards.

- ***Tend to overcrowding of land and cause an undue concentration of population.***

The proposed special use permit will not tend to over crowd the land or create an undue concentration of population.

- *Adversely affect or interfere with public or private schools, parks, playgrounds, water supplies, sewage disposal, transportation or other public requirements, conveniences and improvements.*

The proposed special use permit would not adversely affect the above referenced City services. To the contrary, the proposal would provide positive fiscal (tax) benefits that would enhance the City's ability to provide these services to the proposed development.

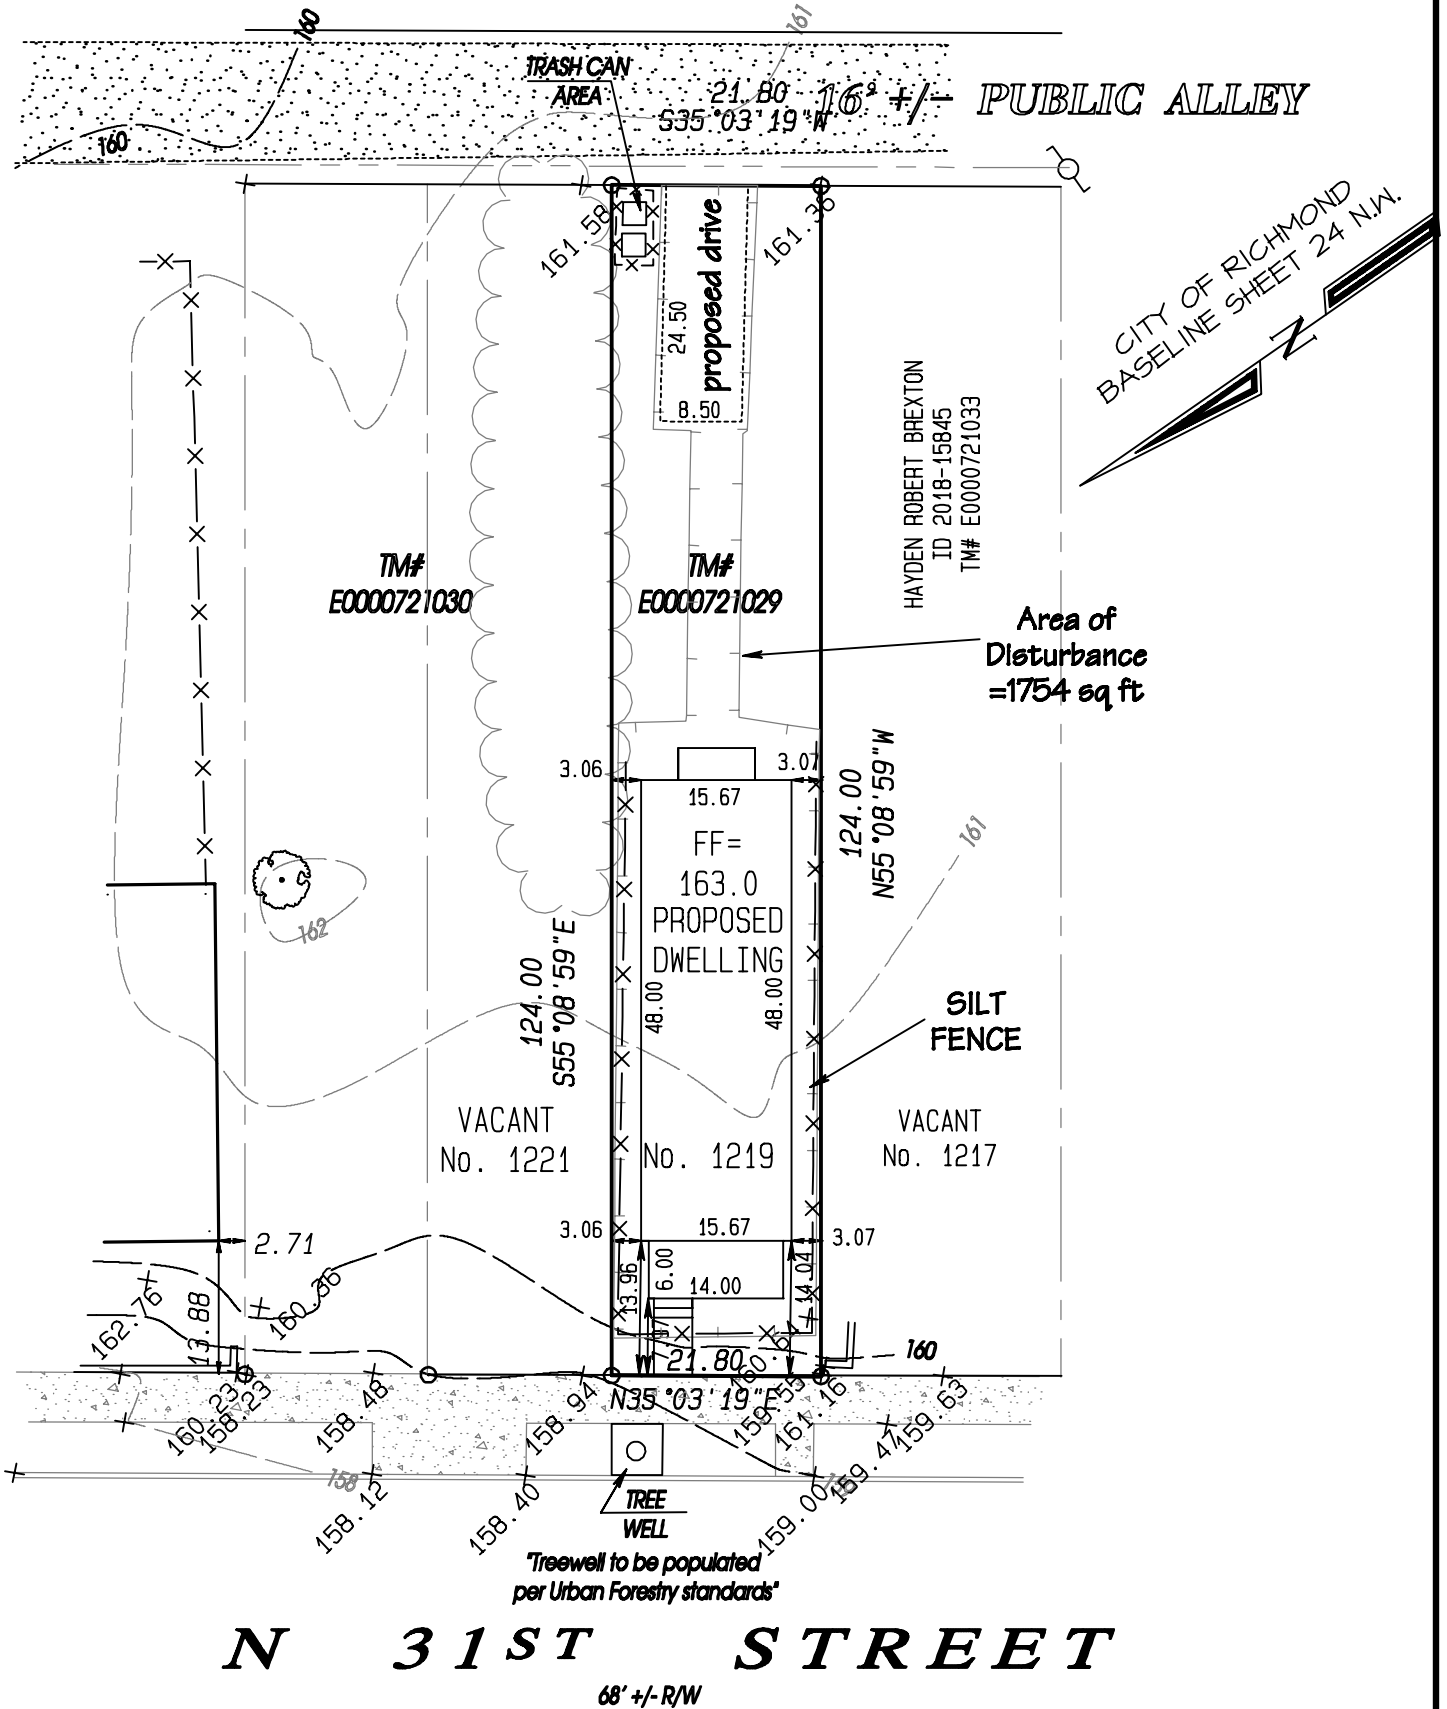

- *Interfere with adequate light and air.*

The light and air available to the subject and adjacent properties will not be affected.

Summary

In summary we are enthusiastically seeking approval for the construction of a new, single-family detached dwelling on the Property. The SUP represents an ideal, small-scale urban infill development for this location. In exchange for the SUP, the quality assurances conditioned therein would guarantee the construction of a quality residence consistent with Master Plan guidance. This would contribute to the overall vibrancy of the block through the provision of an appropriate urban form and use that is consistent with the existing dwellings in the surrounding neighborhood.
