To whom it may concern,

I live in the neighborhood of Charmian Road. The land in question is underwater 6-8 months out of the year. The property filters runoff rainwater from the large hill behind it (up Hillwood Road) and feeds DIRECTLY into the river only 150 yards away. The stream in front of the property flows steadily the whole year and any construction or disruption to this would be devastating to the river and its wildlife. The owner of this property knows that its not buildable... as they have been trying to build on it for 50 years. PLEASE PROTECT this land, as it acts as an important buffer between the Hillwood neighborhood and the river. Any construction or disruption would have very negative consequences.

Thank you

Dale R. Goodrich
