Introduction

The property owner is requesting a special use permit (the "SUP") for 2205 Gordon Avenue (the "Property"). The SUP would authorize the division of the Property and the construction of a new two-family detached dwelling. While the two-family use is supported by the Richmond 300 Master Plan, the use is not permitted by the underlying R-5 Single-Family Residential zoning district and, therefore, a SUP is required.

Existing Conditions

SITE DESCRIPTION AND EXISTING LAND USE

The Property is located on the west side of Gordon Avenue between Mason and E 22nd Streets and is referenced by the City Assessor as tax parcel S000-0549/012. The Property consists of two original subdivision lots (Lots 17 and 18 of Block 14) of the Mason Park Subdivision and is 66' wide by 143' in depth, contains approximately 9,438 square feet of lot area, and is currently improved with a single-family dwelling. Access is provided at the rear of the Property by means of an east-west alley.

The properties in the immediate vicinity are developed primarily with residential uses with a range of building forms. Single-family detached dwellings are the most common uses found in the area, although Two-family dwellings can be found nearby as well. West towards Richmond Road, there are a number of commercial uses as well.

EXISTING ZONING

The Property and those to the north, east, south, and west are zoned R-5 Single-Family Residential. Properties further west, along Richmond Road are zoned B-3 General Business District and across the street there are properties zoned M-1 Light Industrial Residential district and B-6 Mixed-Use Business District

TRANSPORTATION

Located less than a quarter mile from the Property are bus stops served by Route 3 which runs every 30 minutes and provides connection north to the Downtown Transfer Station which provides connectivity throughout the City.

MASTER PLAN DESIGNATION

The Richmond 300 Master Plan (the "Master Plan") suggests "Residential" use for the Property. The Master Plan suggests this future land use designation allow for a variety of housing types that are consistent with the scale, density, and design of what exists in the vicinity. This designation also encourages developments that reinforce a gridded street pattern to increase connectivity. Two-family dwellings are a contemplated use in the Residential future land use designation (p. 54).

In addition to the Property-specific guidance offered by the Vision and Core Concepts chapter, there are a number of other goals elsewhere within the Master Plan that support this request, including:

- Page 109 (Equitable Transportation Chapter), Objective 6.1 to "Increase the number of residents and jobs at Nodes and along enhanced transit corridors in a land development pattern that prioritizes multi-modal transportation options."
 - b. Develop housing at all income levels in and near Nodes and along major corridors (see strategies Goal 14).
- Page 136 (Diverse Economy Chapter), Objective 11.1 to "Increase the areas of appropriately zoned land near various transportation modes and housing to retain, create, and attract employers."
 - d. Encourage the development of a variety of quality housing types to house employees across the economic spectrum (see Goal 14).
- Page 150 (Inclusive Housing Chapter), Objective 14.1 to "Increase city-wide awareness of the importance of integrating housing at all income levels into every residential neighborhood so every household has housing choice throughout the city."
- Page 152 (Inclusive Housing Chapter) (see map on p. 153), Objective 14.5 to "Encourage more housing types throughout the city and greater density along enhanced transit corridors and at Nodes (shown in Figure 38 [p.153]) by amending the Zoning Ordinance."
- Page 155 (Inclusive Housing Chapter), Objective 14.8 to "Develop inclusionary and equitable housing options for our gentrifying neighborhoods to prevent involuntary displacement."

- Page 159 (Thriving Environment Chapter) Objective 15.1 to “Reduce air pollution related to transportation.”
 - a. Increase the number of Richmonders living in a development pattern that encourages density and reduces dependency on single-occupancy vehicles (see Goal 1, Goal 8, Goal 14).
- Page 86 (High-Quality Places Chapter), Objective 1.4, to “maintain and improve primarily residential areas by increasing their linkages to...corridors...and maintaining high-quality design standards.”
- Page 100 (High Quality Places Chapter), Objective 4.1, to “create and preserve high-quality, distinctive, and well-designed neighborhoods and nodes throughout the City,” as the request introduces thoughtfully designed new construction in a manner not otherwise assured by-right.

Proposal

PROJECT SUMMARY

The SUP would permit the division of the Property into two lots and the construction of a new two-family detached dwelling on the newly created lot. The existing single-family dwelling would be retained.

PURPOSE OF REQUEST

The Property consists of a single lot of record which is approximately 66 feet wide and contains roughly 9,438 square feet of lot area. The owner is proposing to split the lot into two lots, consistent with the two original subdivision lots which make up the parcel, and construct a new two-family detached dwelling on the eastern portion of the Property. The existing single-family detached dwelling would be retained on a new lot roughly 33.7' wide and 4,819 square feet of lot area. The new two-family dwelling would be constructed on a new lot of approximately 32.3' wide and 4,619 square feet of lot area. While the two-family use is supported by the Master Plan, the use is not permitted by the underlying R-5 Single-Family Residential zoning district and, therefore, a SUP is required.

In exchange for the SUP, the intent of this request is to ensure the development of a high-quality infill dwelling. The overall project will be appropriately dense and efficient as contemplated by the Richmond 300 Master Plan. At the same time, it will remain respectful to the historic development pattern in the vicinity thereby remaining consistent with the predominant character of the area. Finally, the quality assurances conditioned through the SUP will guarantee a higher quality development than might otherwise be guaranteed with a by right development.

PROJECT DETAILS

The new two-family detached dwelling would be two stories in height and is intended to be consistent with the historic development pattern found throughout the neighborhood.

The units would be configured as flats and each would contain two bedrooms and two and a half bathrooms. Both units would consist of approximately 1,313 square feet of floor area and have been designed to meet the needs of the market. The exterior design would be traditional in style and would be consistent with the character of the area. The building would be designed with a single entrance on the front facade to have the appearance of a single-family detached dwelling from the street.

The new dwelling would be clad in quality building materials including cementitious lap siding in order to ensure durability. A front porch would engage the street and provide usable outdoor living space. The building's massing and architectural style is designed to be compatible with nearby dwellings and is consistent with the historical homes found in the neighborhood.

Findings of Fact

The following are factors indicated in Section 17.11 of the Charter and Section 114-1050.1 of the Zoning Ordinance relative to the approval of special use permits by City Council. The proposed special use permit will not:

- ***Be detrimental to the safety, health, morals and general welfare of the community involved.***

The proposed special use permit for high-quality infill construction will not impact the safety, health, morals and general welfare of the nearby neighborhoods.

- ***Tend to create congestion in streets, roads, alleys and other public ways and places in the area involved.***

The proposed special use permit will not result in significant traffic impacts to nearby residential neighborhoods. The negligible traffic generation will create no congestion on streets, roads, alleys or any other public right of way.

- ***Create hazards from fire, panic or other dangers.***

The Property will be developed in a manner consistent with the requirements of the building code and in accordance with the requirements of Fire and Emergency Services. The City's codes applicable to this development are designed to eliminate such hazards.

- ***Tend to overcrowding of land and cause an undue concentration of population.***

The proposed special use permit will not tend to over crowd the land or create an undue concentration of population.

- ***Adversely affect or interfere with public or private schools, parks, playgrounds, water supplies, sewage disposal, transportation or other public requirements, conveniences and improvements.***

The special use permit will not adversely affect the above referenced City services. To the contrary, the proposal will provide positive fiscal (tax) benefits that will enhance the City's ability to provide these services to the proposed development.

- ***Interfere with adequate light and air.***

The light and air available to the subject and adjacent properties will not be affected. The proposed building is of compatible massing and spacing to the existing in the vicinity. As a result, this request will not interfere with the provision of adequate light and air to the adjacent buildings.

Summary

In summary, we are enthusiastically seeking approval for the construction of the proposed two-family detached dwelling. The building has been thoughtfully designed in order to provide appropriate, high-quality, infill residential development. The request offers compatibility with the City's Master Plan in terms of use. The request would upgrade the Property while maintaining a desirable variation in housing style and type in the vicinity. The traditional building form would provide the much-desired traditional neighborhood design which is appropriate to this area of the City. Finally, the quality assurances conditioned through the SUP would guarantee a higher quality development than might otherwise be developed by right.
