RE: TO AMEND THE FY 2024 ADOPTED CAPITAL IMPROVEMENT PROGRAM BUDGET AND TO AUTHORIZE THE CHIEF ADMINISTRATIVE OFFICER TO ACCEPT AND APPROPRIATE FUNDS FROM THE COMMONWEALTH OF VIRGINIA, DEPARTMENT OF ENVIRONMENTAL QUALITY IN THE AMOUNT OF \$100,000,000.00 FOR THE COMBINED SEWER OVERFLOW PROJECT.

ORD. OR RES. No.

PURPOSE: To amend Ord. No. 2023-073 adopted May 8, 2023, which adopted the Capital Improvement Plan for FY 2024, and to authorize the Chief Administrative Officer, for and on behalf of the City of Richmond, to accept funds in the amount of \$100,000,000.00 from the Commonwealth of Virginia, Department of Environmental quality and appropriate the revenues by amending the FY2024-2028 Capital Improvement Plan (CIP) Budget for the Combined Sewer Overflow project.

BACKGROUND: Richmond’s combined sewer system (CSS) serves approximately 12,000 acres and is comprised of 25 active outfalls.

For the past 50 years, the City has been proactively improving the CSS and the Wastewater Treatment Plant (WWTP), with approximately \$780 million invested (adjusted to 2024 dollars) to reduce combined sewage volume and bacteria discharged to improve water quality in the James River.

In 2020, the Virginia General Assembly enacted Senate Bill 1064 (2020 Combined Sewer Overflow (CSO) Law). The 2020 CSO Law establishes specific timeframes for the development and implementation of an Interim Plan and a Final Plan to satisfy the requirements of any existing Special Order by Consent that has been issued for the CSS. The City of Richmond has developed and submitted this Interim Plan and is finalizing the Final Plan for submission by the July 1, 2024 deadline. The City has an existing “Special Order by Consent” with the Virginia Department of Environmental Quality (DEQ) for their combined sewer system that was amended in 2020 to incorporate the requirements of the 2020 CSO Law.

The City is in the process of implementing the 10 projects identified in the 2021 Interim CSS Plan. Consistent with the requirements of the 2020 CSO Law, these projects will be completed by 2027. These Interim Plan projects are being funded through this State ARPA CSO grant.

The Final Plan projects will further improve CSS performance beyond the post-Interim Plan conditions.

COMMUNITY OUTREACH: DPU has engaged in significant community outreach, both over the life of the forty-plus-year life of the CSO Program, as well more recently over the past two years. These efforts have included a public stakeholder group with two community representatives from each of the nine City Council districts, as well as presentations to City Council standing committees and individual Council District meetings. The stakeholder meetings began in May of 2022 and continued through early 2024. The stakeholders initiated further public outreach to their districts via meetings, newsletters and informal discussion. There has also been significant media outreach to inform the public about this crucial project.

STRATEGIC INITIATIVES AND OTHER GOVERNMENTAL: RESOLUTION No. 2022-R025

FISCAL IMPACT: The FY2024-2028 CIP budget will be amended to accept funds and appropriate \$100,000,000.00 of funds to the Capital Budget in the Wastewater Utility category for the Combined Sewer Overflow project. The funds are 100% reimbursable. City matching funds are not required.

DESIRED EFFECTIVE DATE: Upon adoption.

ELIGIBLE PROJECT DESCRIPTION

Subrecipient: City of Richmond Department of Public Utilities

ARPA Grant No.: CSO-02A

Project Description:

This project consists of the components described below.

- CSO Interim Plan CSO-04 Project: Relocation of the CSO 04 DWF Regulator to utilize upstream in-line storage, and installation of new conveyance sewer to send additional wet weather flow to the Gillies Creek Interceptor.
- CSO Interim Plan Level 2 Controls Project: Automation of the WWTP Main Pumping Station to maximize the operation of the WWUV Facility.
- CSO Interim Plan Regulator Improvements Project:
 - Installation of a new static control device in the CSO 24 DWF Regulator to send additional wet weather flow to the Gillies Creek Interceptor.
 - Installation of a modulating gate in the CSO 39 DWF Regulator to send wet weather flow to the Gillies Creek Interceptor.
 - (CSO 21) Construction of a new Regulator to store additional wet weather flow in the Gordons Avenue Sewer.
 - (CSO 40) Construction of a new in-line storage structure upstream of CSO 15 to store additional wet weather flow in the upstream CSO 1/2 pipe, as capacity allows.
 - (CSO 19A) Installation of a modulating gate in the CSO 19A DWF Regulator to divert additional wet weather flow to the Hampton McCloy Tunnel.
 - (CSO 19B) Installation of a modulating gate in the Hampton St Pump Station to divert additional wet weather flow to the Hampton McCloy Tunnel.
 - (CSO 20) Installation of a modulating gate in the CSO 20 DWF Regulator to divert additional wet weather flow to the Hampton McCloy Tunnel.
- CSO Final Plan CSO 12 Separation & CSO 24 Partial Separation Project: Separation of the remaining draining area of CSO 12 to eliminate the only combined sewer outfall that discharges to Almond Creek and reduce any associated bacteria discharges.
 - Extension of the existing separated stormwater system in the CSO 24 outfall drainage area to allow it to overflow to Gillies Creek, removing the additional flow from the CSO 24 drainage area and reducing overflow volume and overflow events.
- CSO Final Plan CSO 31 Storage Tank Project: Installation of a modulating gate in the CSO 31 DWF Regulator to send wet weather flow to the Gillies Creek Interceptor.

- CSO 6 Outfall Improvements Project: Modification the CSO 06 regulator overflow weir to be above the typical high tide river elevation to provide a secondary means of preventing river intrusion back into the City's combined sewer system.
- CSO Misc. Outfall Regulator Improvements Project: Replacement of the existing Brown and Brown regulators with new, updated equipment to meet the same performance as the existing system.
- Hampton St PS Electrical and I&C Improvements Project: Replacement of the Hampton Street Pumping Station's motor control center and additional control features at the facility.
- Dock Street PS Improvements Project: Improvement of the electrical and I&C equipment will better allow for the optimization of the Dock Street Pumping Station, and optimization of how flow can be conveyed to downstream sewer assets, serving to protect against upstream flooding in the Shockoe Bottom drainage area.

Note: Only those eligible costs falling within the period outlined in Section 4.6 will be eligible for reimbursement through this grant.
