RE: Certificate of Appropriateness at 2111-2119 Venable Street

Members of the Commission,

This memorandum shall serve as the applicant's statement for an application to be reviewed by the Commission of Architectural Review (the "CAR") for the proposed construction of sixteen new single-family attached dwellings on the properties known as 2111, 2113, 2115, 2117, & 2119 Venable Street (the "Property").

The Property is located on the southern line of Venable Street between N 21st and N 22nd Streets and lies in Richmond's Union Hill City Old and Historic District. Existing structures in the district are noted as being known for a variety of architectural styles and materials as well as a range of land uses. The Property is currently developed with a paved parking area associated with the Greater Hope Baptist Church who is selling the Property.

The Property owner is proposing to construct a total of sixteen, single-family attached dwellings on the Property. Two separate facades are proposed for the dwellings which would be configured as groups of two or three attached units with eight units fronting Venable Street to the north and eight units fronting Burton Street to the south. The dwellings fronting Venable Street would consist of a pair of dwellings flanked by two groups of three dwellings. The interior dwellings would be of a design which is reminiscent of traditional Italianate dwellings in the

neighborhood. These would be three stories in height with a setback third floor for a north-facing terrace. The exterior groups of dwellings are designed with a false mansard roof and dormer windows on the third floor. Those units would utilize a south facing third-floor terrace for additional outdoor living area. The dwellings fronting Burton Street would utilize the same pattern with Italianate-style dwellings with third floor terraces facing south for City views. These dwellings have been designed with uniquely stylized cornice-lines to provide variety in the facades.

Each of these dwellings would each contain 3 bedrooms and 2 ½ bathrooms in 1,808 square feet of finished floor area. The dwellings have been designed with a floorplan which offers a living area and kitchen on the first floor. Two bedrooms will be located on the second floor while the third floor would consist of a primary bedroom with walk-in closet and en suite bathroom.

Along with 2111-2119 Venable Street, the property owner has also submitted application for a Certificate of Appropriateness (the "COA") for the adjacent property to the south across Burton Street at 810 & 812 N 22nd Street. These two applications represent an

appropriate development of the currently vacant parcels that is modern but also respectful to the historic Union Hill neighborhood.

Siting:

The Property is one of ten contiguous parcels from 2101 to 2119 Venable Street currently owned by the Great Hope Baptist Church. Sanborn maps show the parcels adjacent to the church were previously occupied with dwellings which were later removed to create the parking lot. The siting of the proposed dwellings is consistent with the historic use of the Property and the development pattern in the area. The nearby 2300 Blocks of Venable and Burton Street present a similar siting of dwellings with homes in the block fronting both Venable and Burton Street. The dwellings will be set back from the street roughly 7.5' which recognizes the siting of many dwellings in the neighborhood which are pulled toward the street to create a unified street wall and allow for larger rear yards.

Form:

The proposed dwellings have been designed to reflect the lot configuration of the area and to be consistent with traditional row house forms found in the area. While the underlying

R-63 zoning district suggests that the roughly 18,700 square foot parcel (2111-2119 Venable) could be occupied with a three-story multifamily dwelling containing up to 18 dwelling units, the applicant has chosen to develop the site in a manner which is more consistent with the development pattern of the area. The proposed Italianate and false mansard designs were created to meet the CAR Guidelines and have been approved elsewhere in the Union Hill and other City Old and Historic Districts.

Attached dwellings can be found along Venable Street and throughout the Union Hill district. The proposed dwellings feature a design which appeals to the current homebuyer along with details which reflect the historic nature of the neighborhood. Each dwelling would include traditional details which can be found in the neighborhood such as transom windows above the front door and front stoops or porches with hip roofs. A combination of dwelling styles is not only consistent with the Union Hill neighborhood which is noted as being distinct for its "wide variety of architectural styles" within the Old and Historic District guidelines but is also consistent with the new Richmond 300 Master Plan which recommends the city "allow and encourage a variety of architectural styles."

Scale:

The proposed construction of the new dwelling is consistent with the scale and character of the proposed site layout and existing neighborhood and will appear appropriate from street level. Dwellings in the area are of a range of heights with three story dwellings located nearby at 2116, 2117, 2119, and 2121 Cedar Street. A dwellign dimilar to what is proposed, three-stories with a setback third floor, was also approved in 2021 nearby at 803 Jessamine Street.

Height, Width, Proportion, & Massing

At three stories, the proposed dwellings are comparable in height with other structures on the block. The setback third floor or sloped false mansard roof reduce the visibility of the

third floor of the dwellings from the street while the spacing between groups of homes allows for visibility and avoids a monolithic design.

Exterior Cladding/Doors and Windows/Materials

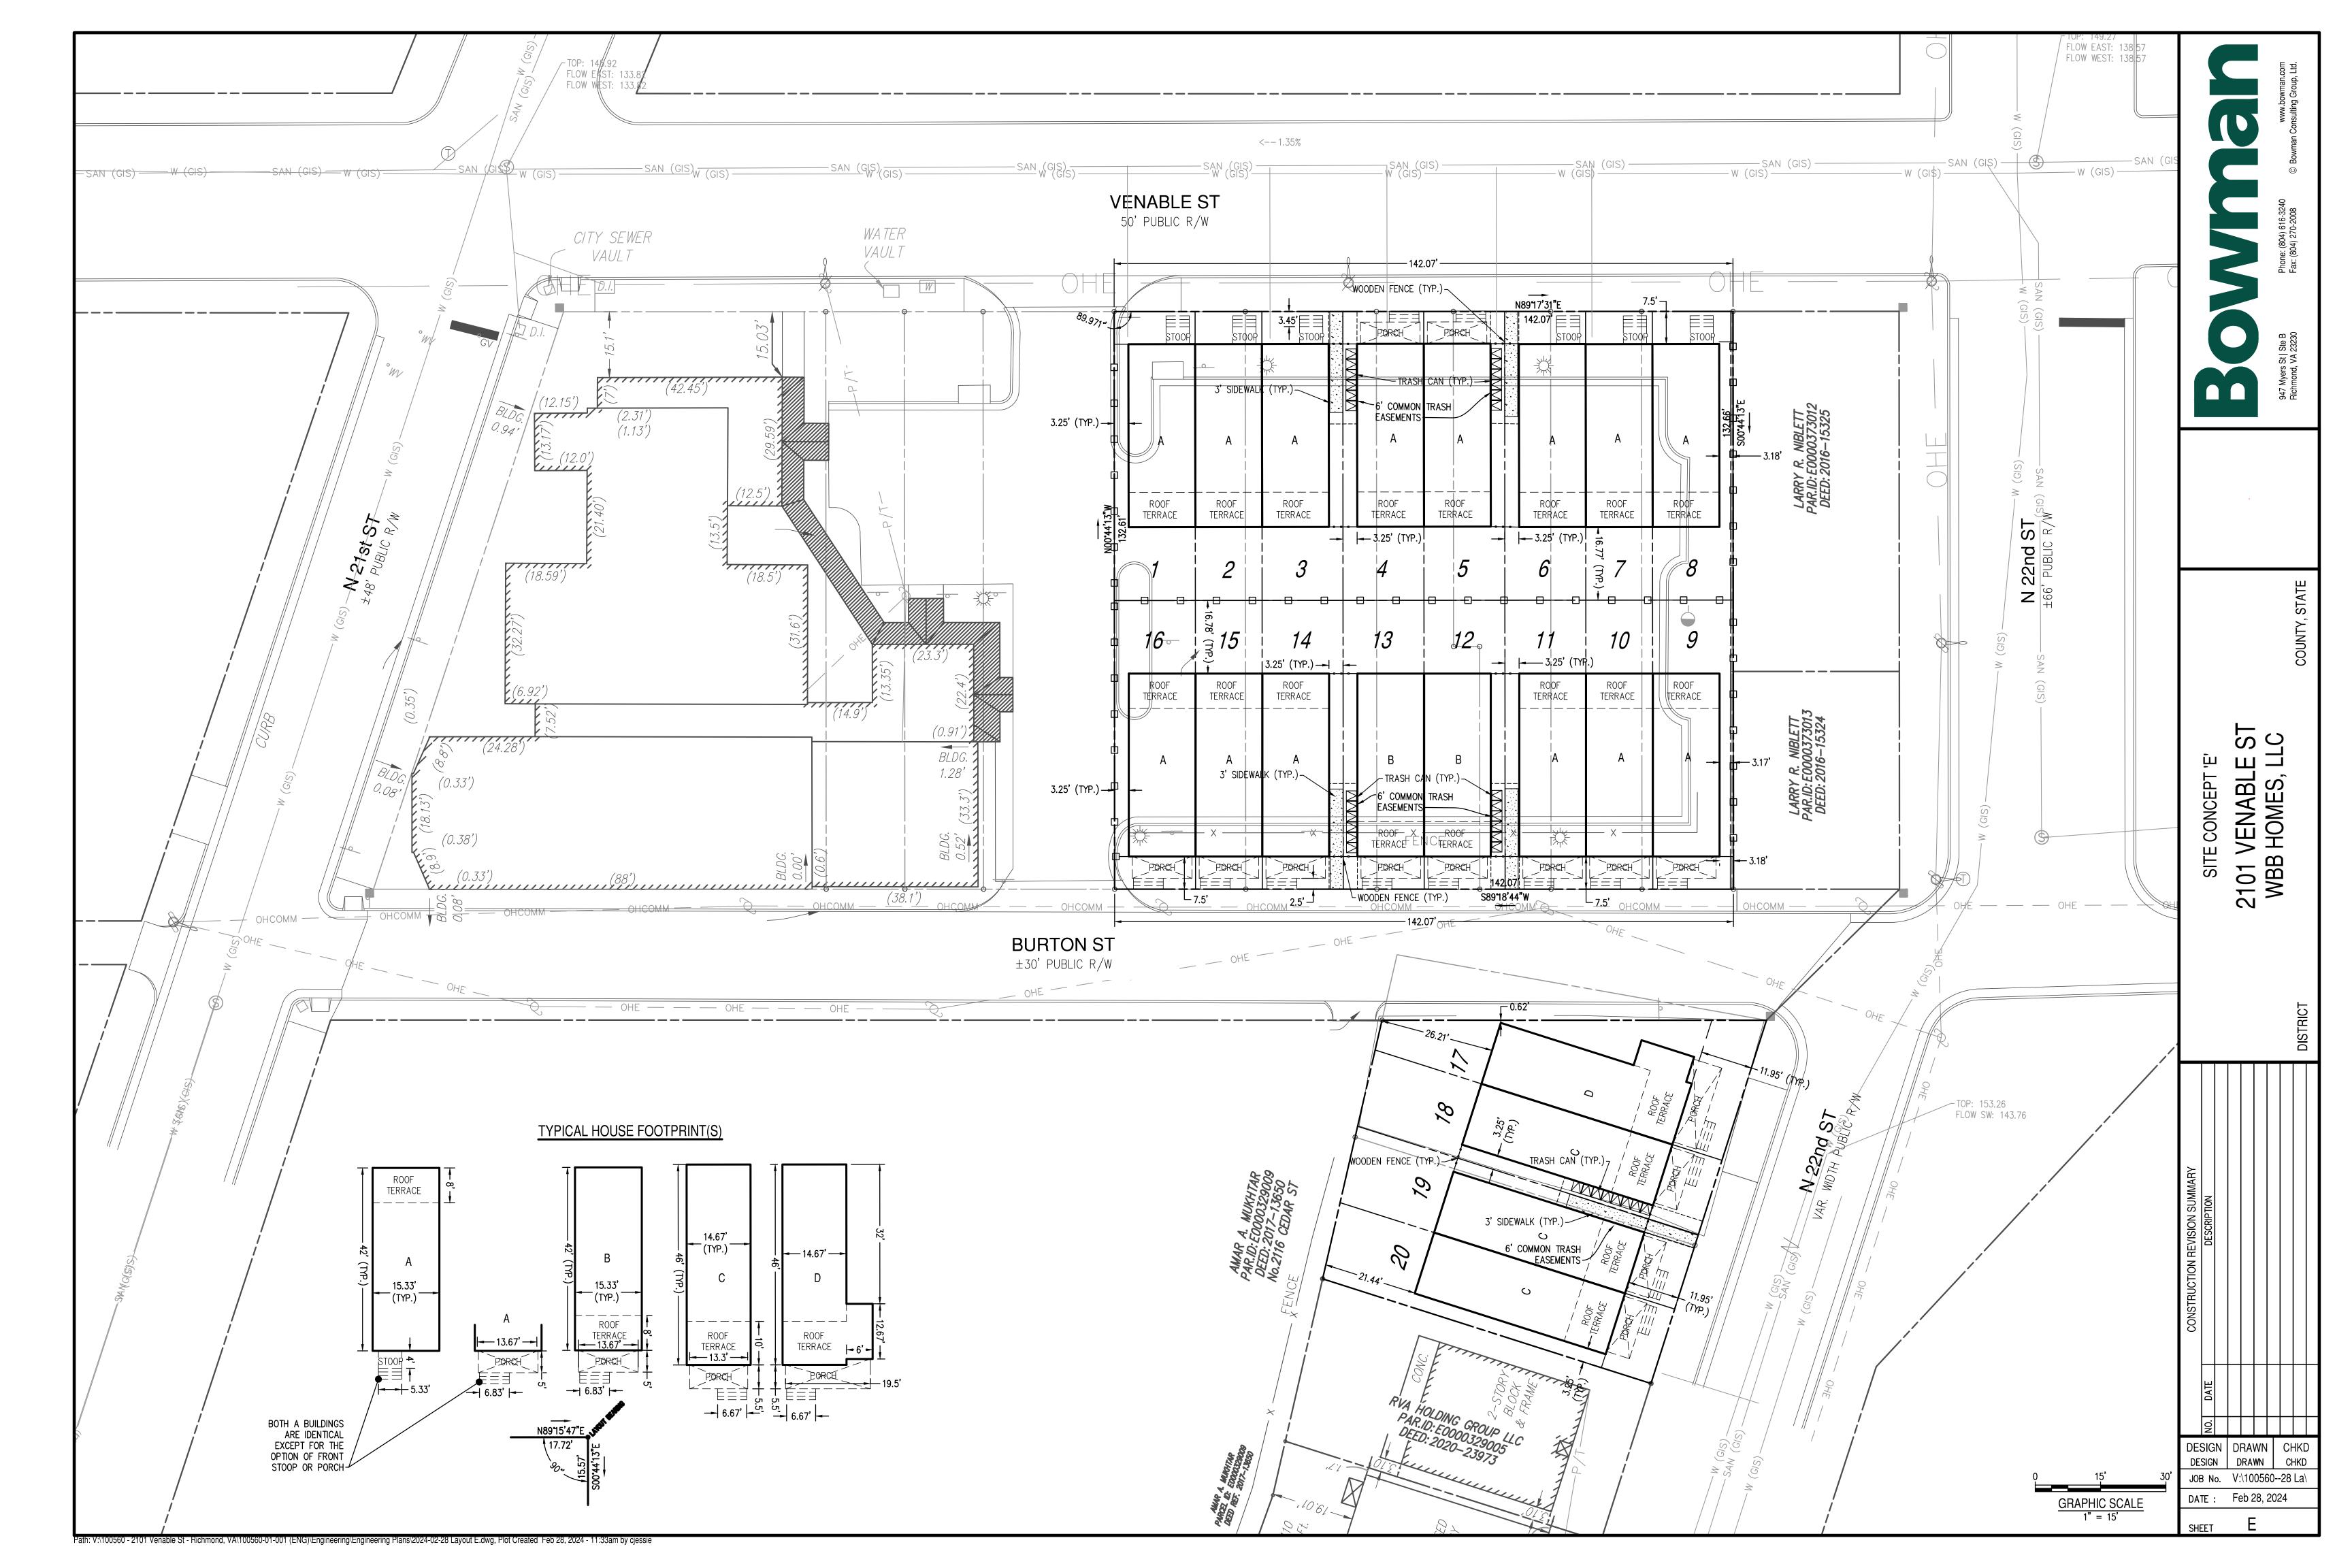

Exterior cladding, doors and windows, foundation, and roofing are as noted on the attached plans. Cementitious siding was chosen for its durability and desirable aesthetics. A standing seam metal porch roof provides low maintenance, weather resistance, and compatibility with other. These items were selected to be consistent with CAR requirements and other dwellings within the Union Hill Old and Historic District. A finish schedule including doors and windows is provided for the proposed dwellings.

The proposed design is compatible with the historical fabric of the block as it recognizes the siting, scale, form, and massing of the contributing structures on the block. As noted by the CAR's Handbook and Design Review Guidelines, the Union Hill City Old and Historic District is characterized by a wide variety of architectural styles. The proposed dwellings provide modern architectural style offering new and desirable housing opportunities within the area while remaining consistent with the fabric of the historic district. Furthermore, many of the design elements of the proposed dwellings can be found on historically significant dwellings throughout the Union Hill district. The proposed single-family attached dwellings address the unique considerations of the lot size, shape, and underlying zoning while also acknowledging the historical characteristics of the Union Hill Neighborhood.
