## Findings of Fact

Site Description	The site is located in the Right-of-Way median for East Broad Street, between 4th Street and 7th Street.
------------------	--

Scope of Review The project is subject to location, character, and extent review under section 17.05 and 17.07 of the Richmond City Charter.

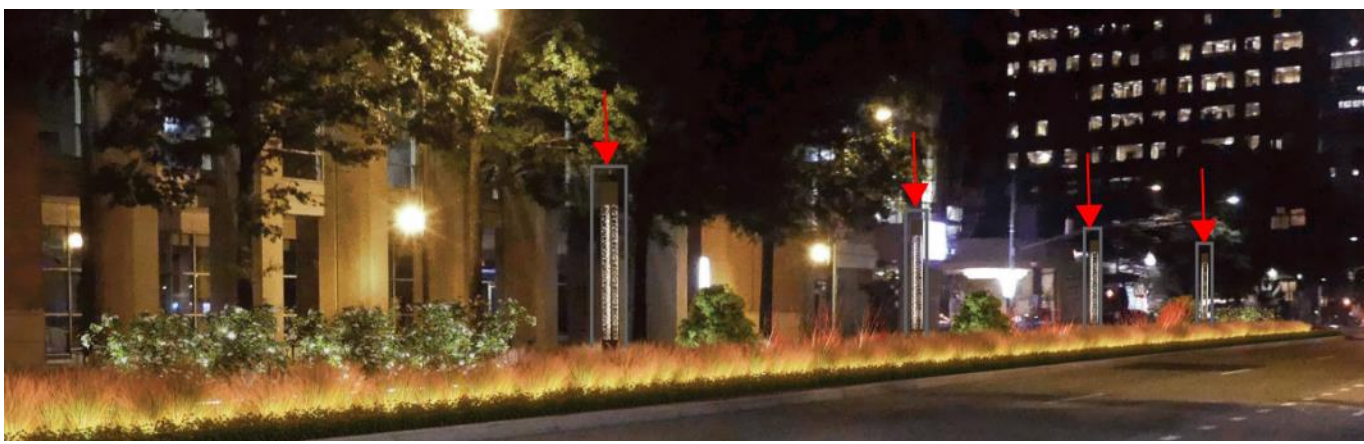

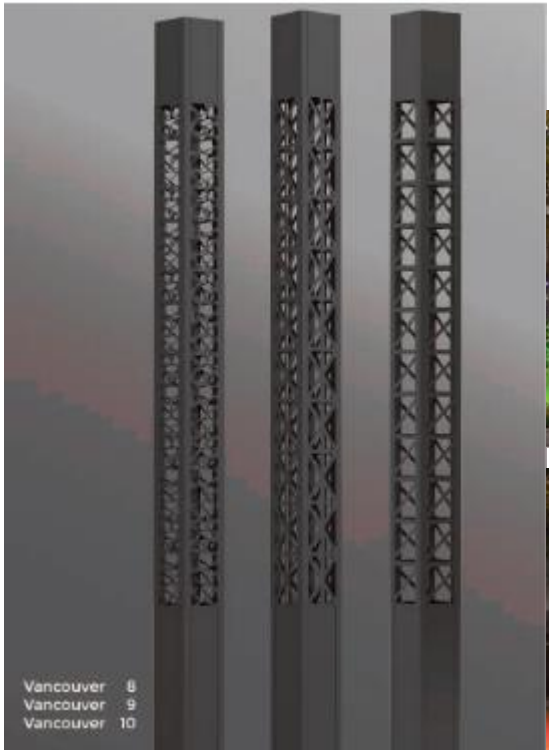

Project Description The purpose of the project is to provide gateway improvement as drivers approach the East Broad Street business and convention center corridor, funded by ARPA funded Gateway Beautification Project.

The Broad Street medians are currently mulched without vegetation and have landscape planters. The desire is to landscape the vacant medians between 4th and 7th Street and install lighting to complement the new landscape along Broad Street.

The UDC heard the application at its previous meeting in May 2024. The UDC determined that not enough information was provided to be considered a complete application. The UDC requested specific locations for the proposed light columns, specifics on the light columns such as height, and renderings.

The Applicant has provided the requested information.

Four light columns are proposed on each large median. One light column is proposed on the small median inbetween. The columns will be about **12ft tall**. 12ft is roughly the accepted height for items in the ROW to be easily seen by vehicles. The columns lighting will change color in tandem with ground lighting and is not intended to blink or change colors quickly to avoid distraction to drivers.

	<p>_____</p> <p><b>Staff recommends approval.</b> The proposal enhances an important corridor within the City, adding interest and quality visual improvements to add in economic development in the area.</p> <p>_____</p> <p><b>UDC recommends approval.</b></p> <p>The UDC discussed landscaping, landscaping irrigation, and had concerns over the quality of the design. One UDC member expressed concern over the design being bland and not specific to Richmond.</p> <p>A majority of the Committee voted to recommend approval.</p>
