Project Information

Project Type: Alteration Demolition New Construction (Conceptual Review Required)

Description (attach additional sheets if needed):

New single-family detached dwelling. See attached for additional information

Acknowledgement of Responsibility

Compliance: If granted, you agree to comply with all conditions of the certificate of appropriateness (COA). Revisions to approved work require staff review and may require a new application and approval from the Commission of Architectural Review (CAR). Failure to comply with the conditions of the COA may result in project delays or legal action. The COA is valid for one (1) year and may be extended for an additional year, upon written request and payment of associated fee.

Requirements: A complete application includes all applicable information requested on checklists available on the CAR website to provide a complete and accurate description of existing and proposed conditions, as well as payments of the application fee. Applications proposing major new construction, including additions, should meet with staff to review the application and requirements prior to submitting an application. Owner contact information and signature is required. Late or incomplete applications will not be considered.

Zoning Requirements: Prior to Commission review, it is the responsibility of the applicant to determine if zoning approval is required and application materials should be prepared in compliance with zoning.

RE: Commission of Architectural Review: 2307 Carrington Street (E0000-470/004)

Members of the Commission,

This memorandum shall serve as the applicant's statement for an application to be reviewed by the Commission of Architectural Review (the "CAR") for the proposed construction of a new single-family detached dwelling on the property known as 2307 Carrington Street (the "Property").

The Property is located on the south side of Carrington Street between Pink and Russell Streets and lies in Richmond's Union Hill City Old and Historic District. Existing structures in the district are known for a variety of architectural styles and materials as well as a range of land uses. While dwellings in the Union Hill Old and Historic District offer excellent examples of 19th and early 20th century architecture, many properties in the immediate vicinity along Carrington and Pink Streets are developed with relatively recent construction or are currently vacant.

The Property owner is proposing to construct a two-story, single-family detached dwelling on the Property. The dwelling would contain 3 bedrooms and 2 ½ bathrooms in 2,340 square feet of finished floor area. The dwelling has been designed with floorplans which offers a modern and open living area on the first floor. Three bedrooms will be located on the second floor including a master bedroom with walk-in closet and en suite bathroom.

Siting:

The new dwelling at 2307 Carrington Street fronts onto the triangular intersection of Carrington and Pink Streets. The dwelling will be set back from the street in a manner that recognizes the unique geometry of the frontage and is also compatible with the setbacks of the proposed dwellings at 2309 and 2311 Carrington Street. Street. The siting of the new dwelling is compatible with others within the area and will present a consistent and unified street frontage along Carrington and Pink Streets while recognizing the unusual street grid of the area which is a distinguishing feature of the Union Hill City Old and Historic District.

Figure 1: Site plan of proposed dwelling and intersection of Pink and Carrington Streets

Form:

The dwelling at 2307 Carrington Street has been designed in a manner which is consistent with the form of other structures in the neighborhood while also contemplating the underlying R-63 zoning requirements and the unique configuration of the lot on which it is situated.

Figure 2: Historic dwellings at 600 and 604 N 22nd Street showing front porch columns and window shutters

Single-family detached dwellings can be found along Carrington Street and throughout the Union Hill district. The proposed design and Colonial Revival features, including the columned front porch and decorative pendants along with the unusual street grid on which the dwelling fronts create a structure which acknowledges the needs of the modern homebuyer while remaining sensitive to the historic fabric of the neighborhood.

Scale:

The proposed construction of the new dwelling is consistent with the scale and character of the existing neighborhood and will appear appropriate from street level.

Height, Width, Proportion, & Massing

A contextual exhibit is included with this request. The proposed dwelling is comparable in height with other structures on the block. Existing structures along Carrington Street range from two to four stories. Single-family dwellings range in height from one to three stories with two-story detached dwellings being found in the immediate vicinity at 2203, 2209, and 2317 Carrington Street. The façade of the dwelling has a variable setback to create visual interest and to better address the geometry of the angular frontage.

Figure 3: Range of forms and heights in dwellings fronting the intersection of Princess Anne Ave. and N 21st Street.

Exterior Cladding/Doors and Windows/Materials

Exterior cladding, doors and windows, foundation, and roofing are as noted on the attached plans. These items were selected to be consistent with CAR requirements and nearby dwellings. A finish schedule including doors and windows is provided for the proposed dwellings.

The proposed design would be compatible with the historical fabric of the block as it recognizes the siting, scale, form and massing of the contributing structures on the block. As noted by the CAR's *Handbook and Design Review Guidelines*, the Union Hill City Old and Historic District is characterized by its unusual street grid. The proposed dwelling addresses this unique attribute of the neighborhood in an architectural style consistent with the fabric of the historic district while offering new and desirable housing opportunities within the area. Furthermore, many of the design elements of the proposed dwelling can be found on historically significant dwellings throughout the Union Hill district. The proposed single-family detached dwelling addresses the unique considerations of the lot size, shape, and underlying zoning while also acknowledging the historical characteristics of the Union Hill Neighborhood.

We thank you for the care and assistance in reviewing our application. Should you have any questions after reviewing this request, please feel free to contact me at markbaker@bakerdevelopmentresources.com or (804)874-6275.

Sincerely,

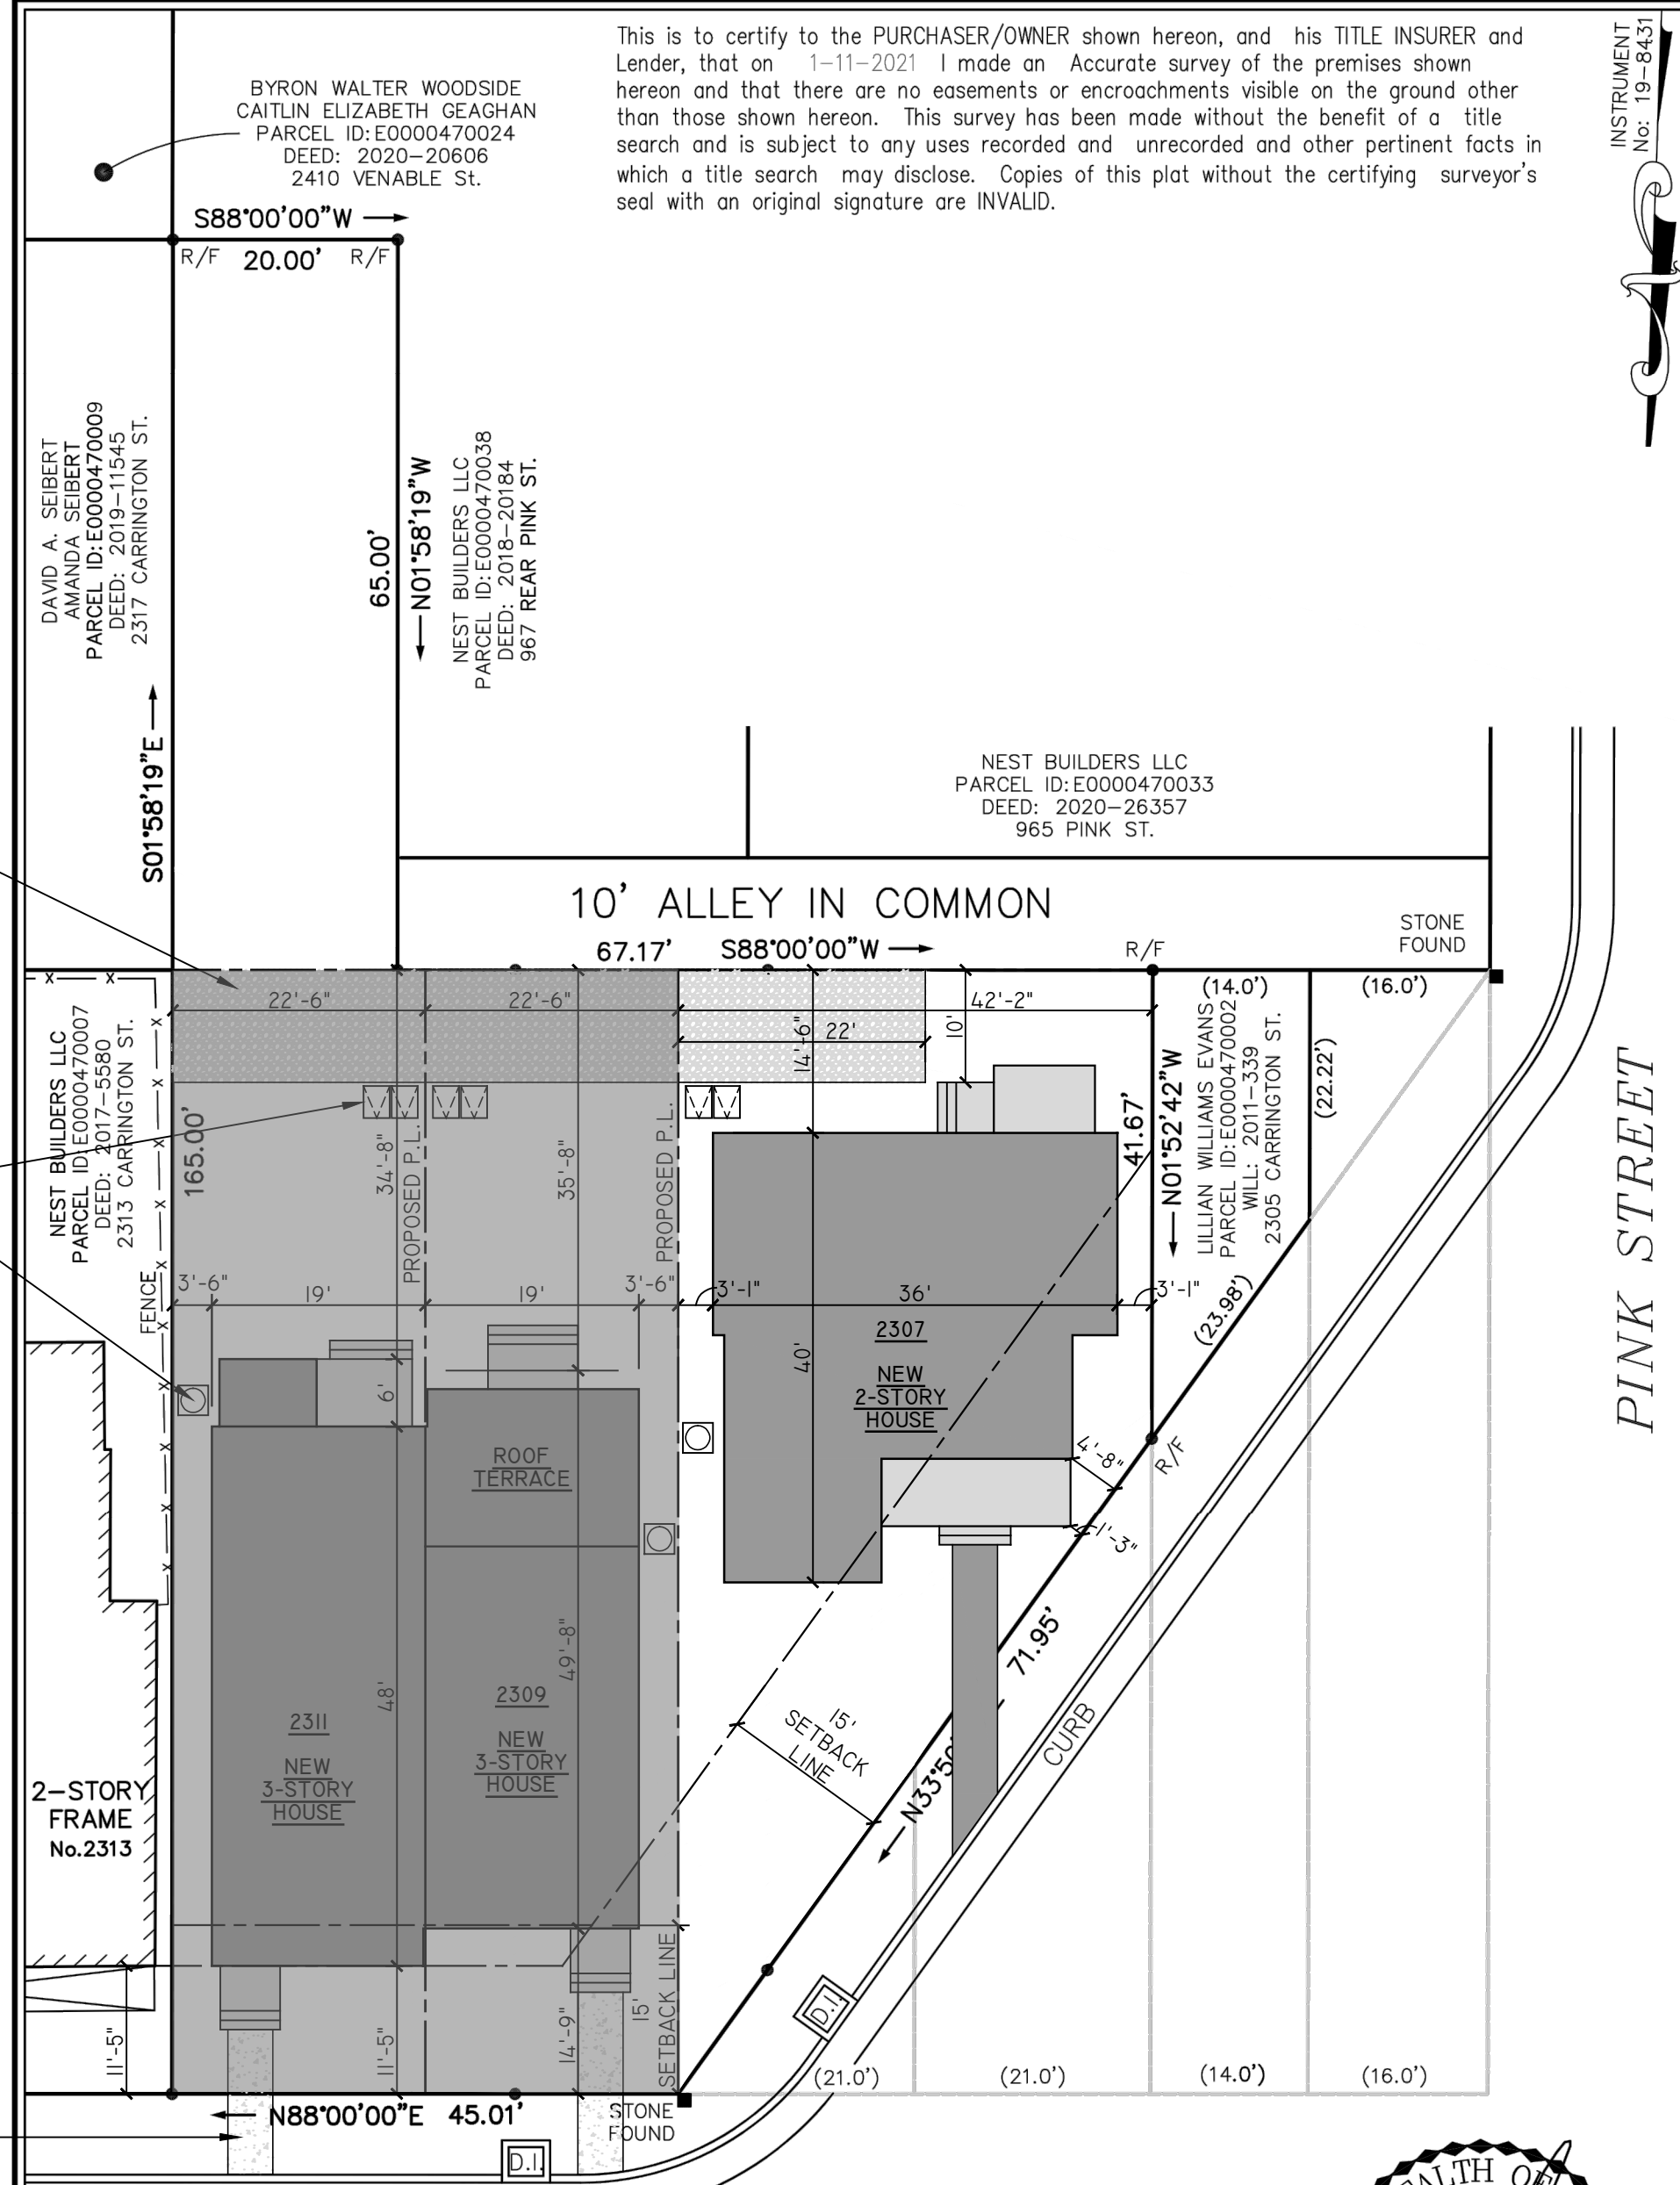

Mark R. Baker
