SUGGESTED STANDING COMMITTEE

ORDINANCE/RESOLUTION SUMMARY

- The Patron requests an ordinance to establish a new category for imposition of the Business Professional and Occupational License Tax for technology Businesses created after July 1, 2020.
- Technology Business shall be defined as:
"Technology business" means a business that derives its gross receipts primarily from the sale, lease, license or provision of innovative or advanced technology based products, processes or services created, designed, developed, produced, manufactured or performed by such business. Products, processes and services shall incorporate or support the use of innovative or advanced technologies having applications in one or more of the following categories: (1) cybersecurity, personal security and property security; (2) sea level rise and recurrent flooding; (3) medical devices, medical diagnostics, pharmaceuticals, biotechnology, biochemical engineering and other life sciences and health care technologies; (4) advanced materials and advanced manufacturing; (5) computer hardware and software; (6) electronics and instrumentation; (7) photonics and sensors; (8) internet and e-commerce; (9) educational and training technologies, including modeling and simulation; (10) bio-informatics and data analytics; (11) logistics and maritime commerce; (12) information technology, telecommunications and wireless technologies; (13) green technologies, renewable energy research and development, and energy conservation; (14) advanced transportation technologies; (15) nanotechnology; (16) financial technology; and (17) aerospace engineering, systems, and products and parts

manufacturing. The use of computers, telecommunications services, or a web page or internet site shall not, in itself, be sufficient to qualify as a technology business.

- The BPOL tax rate for Technology Business shall be established at \$0.10 per \$100 of Gross Receipts.

BACKGROUND

Summary:

- The patron believes that creation of a BPOL tax rate specifically for technology that is set at a level competitive with surrounding localities will allow the City of Richmond to develop more technology businesses and related employment.
- The proposed Definition of a Technology Business is derived from that used by the City of Norfolk.
- The City of Richmond currently imposes a BPOL tax of \$0.58 per \$100 of Gross Receipts for Professional Services, and \$0.19 per \$100 of for Contractors.
- In the Richmond region Chesterfield County Economic Development reports three BPOL rates on what may be viewed as technology businesses:

| Category | Tax per \$100 |
|----------------------------------------------|---------------|
| Biotechnology, R&D, Information Services | \$0.10 |
| Research & Development (Federal Contractors) | \$0.03 |
| Computer Service | \$0.03 |

ADMINISTRATIVE IMPACT STATEMENT

Date: July 15, 2021

Ordinance/Resolution No. 2019-275 and Companion Paper: Establishment of a Technology Zone Program in the City of Richmond

Patron: Councilman Addison

Legislative History: Introduced October 14, 2019
Amendment of City Code sections 26-872 and 26-989

Administrative Staff Presenting: Leonard Sledge, Director of Economic Development

Impact Statement Summary: The ordinance will require additional staff support to review, monitor, and verify certification, application and compliance processes.

Staff Position: Staff does not oppose the intent of the legislation, but believes more time is needed to understand the fiscal implications and to establish cross departmental processes and procedures for the administration of the program. It is anticipated that additional staff will be required to administer the program.

Administrative Impact Statement of draft Ordinance/Resolution No:

The Department of Economic Development (DED) is in favor of programs that stimulate business growth, investment, and job creation in the city. Technology related businesses across industry clusters continues to be an emphasis for business attraction, retention, and expansion in the city. DED supports allocating resources to grow and attract technology businesses.

It is unclear exactly what the fiscal impact will be at this point for the proposed Ordinance because the current revenue generated by technology businesses is unknown. It can be reasonably assumed, however, that such a program will stimulate more new technology businesses to locate or grow in the city vs. in competing localities. Therefore, new revenue will be generated that otherwise may not be realized in the city. As many businesses use technology to carry out their activities, it is imperative to clearly define a process to determine which businesses will be

defined as technology for the purpose of implementing any incentive program designed for technology businesses.

DED has initiated an Economic Development Strategic Planning process that will evaluate our existing incentive programs and benchmark them with competing localities. We believe that a more comprehensive approach to incentive reform is needed. Staff respectfully requests additional time to work with the Council to refine the ordinance and ensure that proper staffing and city resources can be put in place prior to the adoption of such an ordinance.
