Re: Conditional Use Permit Request: 505 West Leigh Street, Tax Map No. N000/0209-031.

Dear Mr. Ebinger:

This letter shall serve as the applicant's report accompanying a conditional use permit request (the "CUP") for the property known as 505 West Leigh Street, identified as Tax Parcel N000/0209-031 (the "Property"). The Property is an irregular shape located on the south side of West Leigh Street between Brook Road, North Monroe Street and Catherine Street. The Property consists of a single lot of record containing 1.62 acres of land area that is unimproved (vacant). The CUP would facilitate the development of the Property with a three-story building containing 50 lodginghouse units and surface parking ("The Ronald McDonald House").

The Property is zoned R-73 Multi-Family Residential District, which permits the proposed use by a conditional use permit. The Ronald McDonald House will provide extended-stay lodging to families whose children are undergoing medical treatment, allowing families to remain close to their child's healthcare provider. For families seeking stays of less than one week, they will be referred to the in-hospital house at Children's Hospital of Richmond at VCU. This distinction allows us to reserve the Ronald McDonald House for those families requiring longer-term accommodations due to the nature of their child's medical treatment.

The surrounding properties to the south, east and northeast are zoned R-6 Single-Family Attached Residential District. Consistent with this zoning designation, these properties are occupied by Single-family attached dwellings and uses and structures customarily incidental to attached dwelling developments. Properties to the north, across West Leigh Street are zoned B-2 Community Business. These properties are occupied by multi-family apartments and unimproved (vacant) lots. Properties to the northwest and west are also zoned R-73 Multi-Family Residential and are currently unimproved (vacant).

The proposed lodginghouse units would be primarily configured on floors two and three, with twenty-three (23) to twenty-seven (27) units per floor. The units contain two queen beds, a full bathroom and desk space. A courtyard amenity space would be available for the use of residents, and would be improved with hardscaping, landscaping, and seating areas.

The ground floor will contain a Lobby, Resident dining area, Resident/Volunteer kitchen, Resident amenities, utility rooms, and office space for Ronald McDonald House Staff. Fifty (50) surface parking spaces are available directly to the west of the building. Access to the surface parking area would be from West Leigh Street as no other street is available for adequate access. It is worth noting that the proposed configuration would limit access to one drive so as to minimize potential vehicular conflict along Catherine Street.

The Richmond 300 recommends "Neighborhood Mixed-Use" for the Property. This land use category is described in the Richmond 300 as "highly-walkable urban neighborhoods that are predominantly residential with a small, but critical, percentage of parcels providing retail, office, personal service, and institutional uses." (Richmond 300, p. 82). The recommended density for this land use designation is described as being two (2) to four (4) stories. Typical principal uses include Single-family houses, accessory dwelling units, duplexes, small multi-family buildings (typically 3-10 units), and open space. Secondary uses include large multifamily buildings (10+units), retail/office/personal service, institutional, cultural, and government buildings. The property is also located within the priority growth node, Downtown – Jackson Ward. The Vision for new developments within the node is outlined in The Richmond 300, "New infill developments incorporate high quality architecture and complement the character of historic buildings." The Richmond 300 (p. 30) also states the potential for growth in the area as in 2019 there were approximately 29 acres of vacant/underdeveloped land in Jackson Ward. The proposed Ronald McDonald House would include, but not be limited to, developing previously vacant land, providing a more walkable and vibrant corridor, and a compelling transition between disparate zoning uses.

The following are factors included in Section 30-1045.5 of the Zoning Ordinance relative to the approval of Conditional Use Permits by City Council. The proposed conditional use permit:

- **Will not be contrary to the general purposes of this chapter as stated in section 114-100;**
  The proposed CUP will comply with the general purposes of the zoning code. The answers below will provide detailed responses demonstrating the development's compliance.

- **Will not be in conflict with the objectives and policies of the master plan for the City.**
  The development of this property as proposed, would develop unimproved land in a priority growth node, complement the scale of its' surroundings, and provide high quality architecture and materials that harmonize with the neighborhood, all of which, will meet the vision laid out by The Richmond 300 Master Plan.

- **Will conform with all applicable sections of this article and other applicable requirements of the district in which it is proposed to be located.**
  The proposed CUP complies with R-73 Multi-Family Residential District requirements, as well as requirements for conditional use.

- **Will not substantially diminish or impair the established property values in the neighborhood in which it is proposed to be located.**
  The proposed CUP will not impair established property values in the neighborhood involved. The development of the unimproved lot would provide a more walkable and vibrant corridor and thus will not adversely impact property values of the neighborhood.

- **Will not have an undue adverse effect on the public health, safety or general welfare.**
  The proposed CUP will not impact the safety, health, morals and general welfare of the community involved. The development of this underutilized property as proposed, in conjunction with the

high quality/benefits provided by the CUP, will provide positive impacts in terms of health, welfare, etc.

- **Will not adversely affect the character of the surrounding area or the continued use and development of surrounding property in a manner consistent with applicable zoning regulations or master plan objective.**
  The property will be developed in a manner consistent with the requirements of the zoning ordinance and residential style of the neighborhood.

- **Will not cause undue traffic congestion on public streets or significantly increase traffic volumes on minor residential streets**
  The proposed CUP will not result in significant traffic impacts to nearby residential neighborhoods. The anticipated traffic generation will easily be handled by the existing road network. The vehicular access point is limited to the arterial road of West Leigh Street, alleviating any potential impacts to nearby minor residential streets. As such, the CUP will not create congestion on streets, roads, alleys or any other public right of way.

- **Will be adequately served by essential public services and facilities and will not cause an undue burden on such services and facilities**
  The proposed CUP would not adversely affect the above-referenced City services. The development would provide several amenities for its users that would remove reliance on public services or facilities.

- **Will not cause the destruction, loss or damage of significant natural, scenic or historic features to any greater degree than development of the property for uses permitted by right in the district**
  The property is an unimproved (vacant) lot and thus will not cause damage to the public features referenced above.

- **Will ensure compatibility with surrounding property through existing and proposed landscaping, screening and buffering and the location, arrangement and character of existing and proposed buildings, structures, open spaces, parking areas, vehicular circulation, driveways, signage and lighting**
  The property will be developed in a manner consistent with the landscape and buffer requirements of its district. The proposed development will create density/intensity on the arterial throughway of West Leigh Street and step down in scale facing the Jackson Ward District.

- **Will not cause or result in any significant increase in negative cumulative impact when considered in conjunction with other conditional uses in the neighborhood in which it is proposed to be located**
  The proposed CUP will not create a negative cumulative impact on its' adjacent neighborhood. The request is consistent with the guidance offered by the Richmond 300 and is therefore representative of the community's goal with regard to density and development of the neighborhood.

Summary

This request represents an ideal urban infill development for this location. The request offers a development alternative that is consistent with the Richmond 300 Masterplan land use recommendation and addresses a number of design-oriented principles contained in the plan. Finally, the quality assurances conditioned through the CUP would guarantee the construction of a higher quality development than might be developed by right.

Thank you for your time and consideration of this request. Should you have any further questions about this request, please do not hesitate to contact me.

Sincerely,

Ethan Porter
