**Acknowledgement of Responsibility**

**Compliance:** If granted, you agree to comply with all conditions of the certificate of appropriateness (COA). Revisions to approved work require staff review and may require a new application and approval from the Commission of Architectural Review (CAR). Failure to comply with the conditions of the COA may result in project delays or legal action. The COA is valid for one (1) year and may be extended for an additional year, upon written request and payment of associated fee.

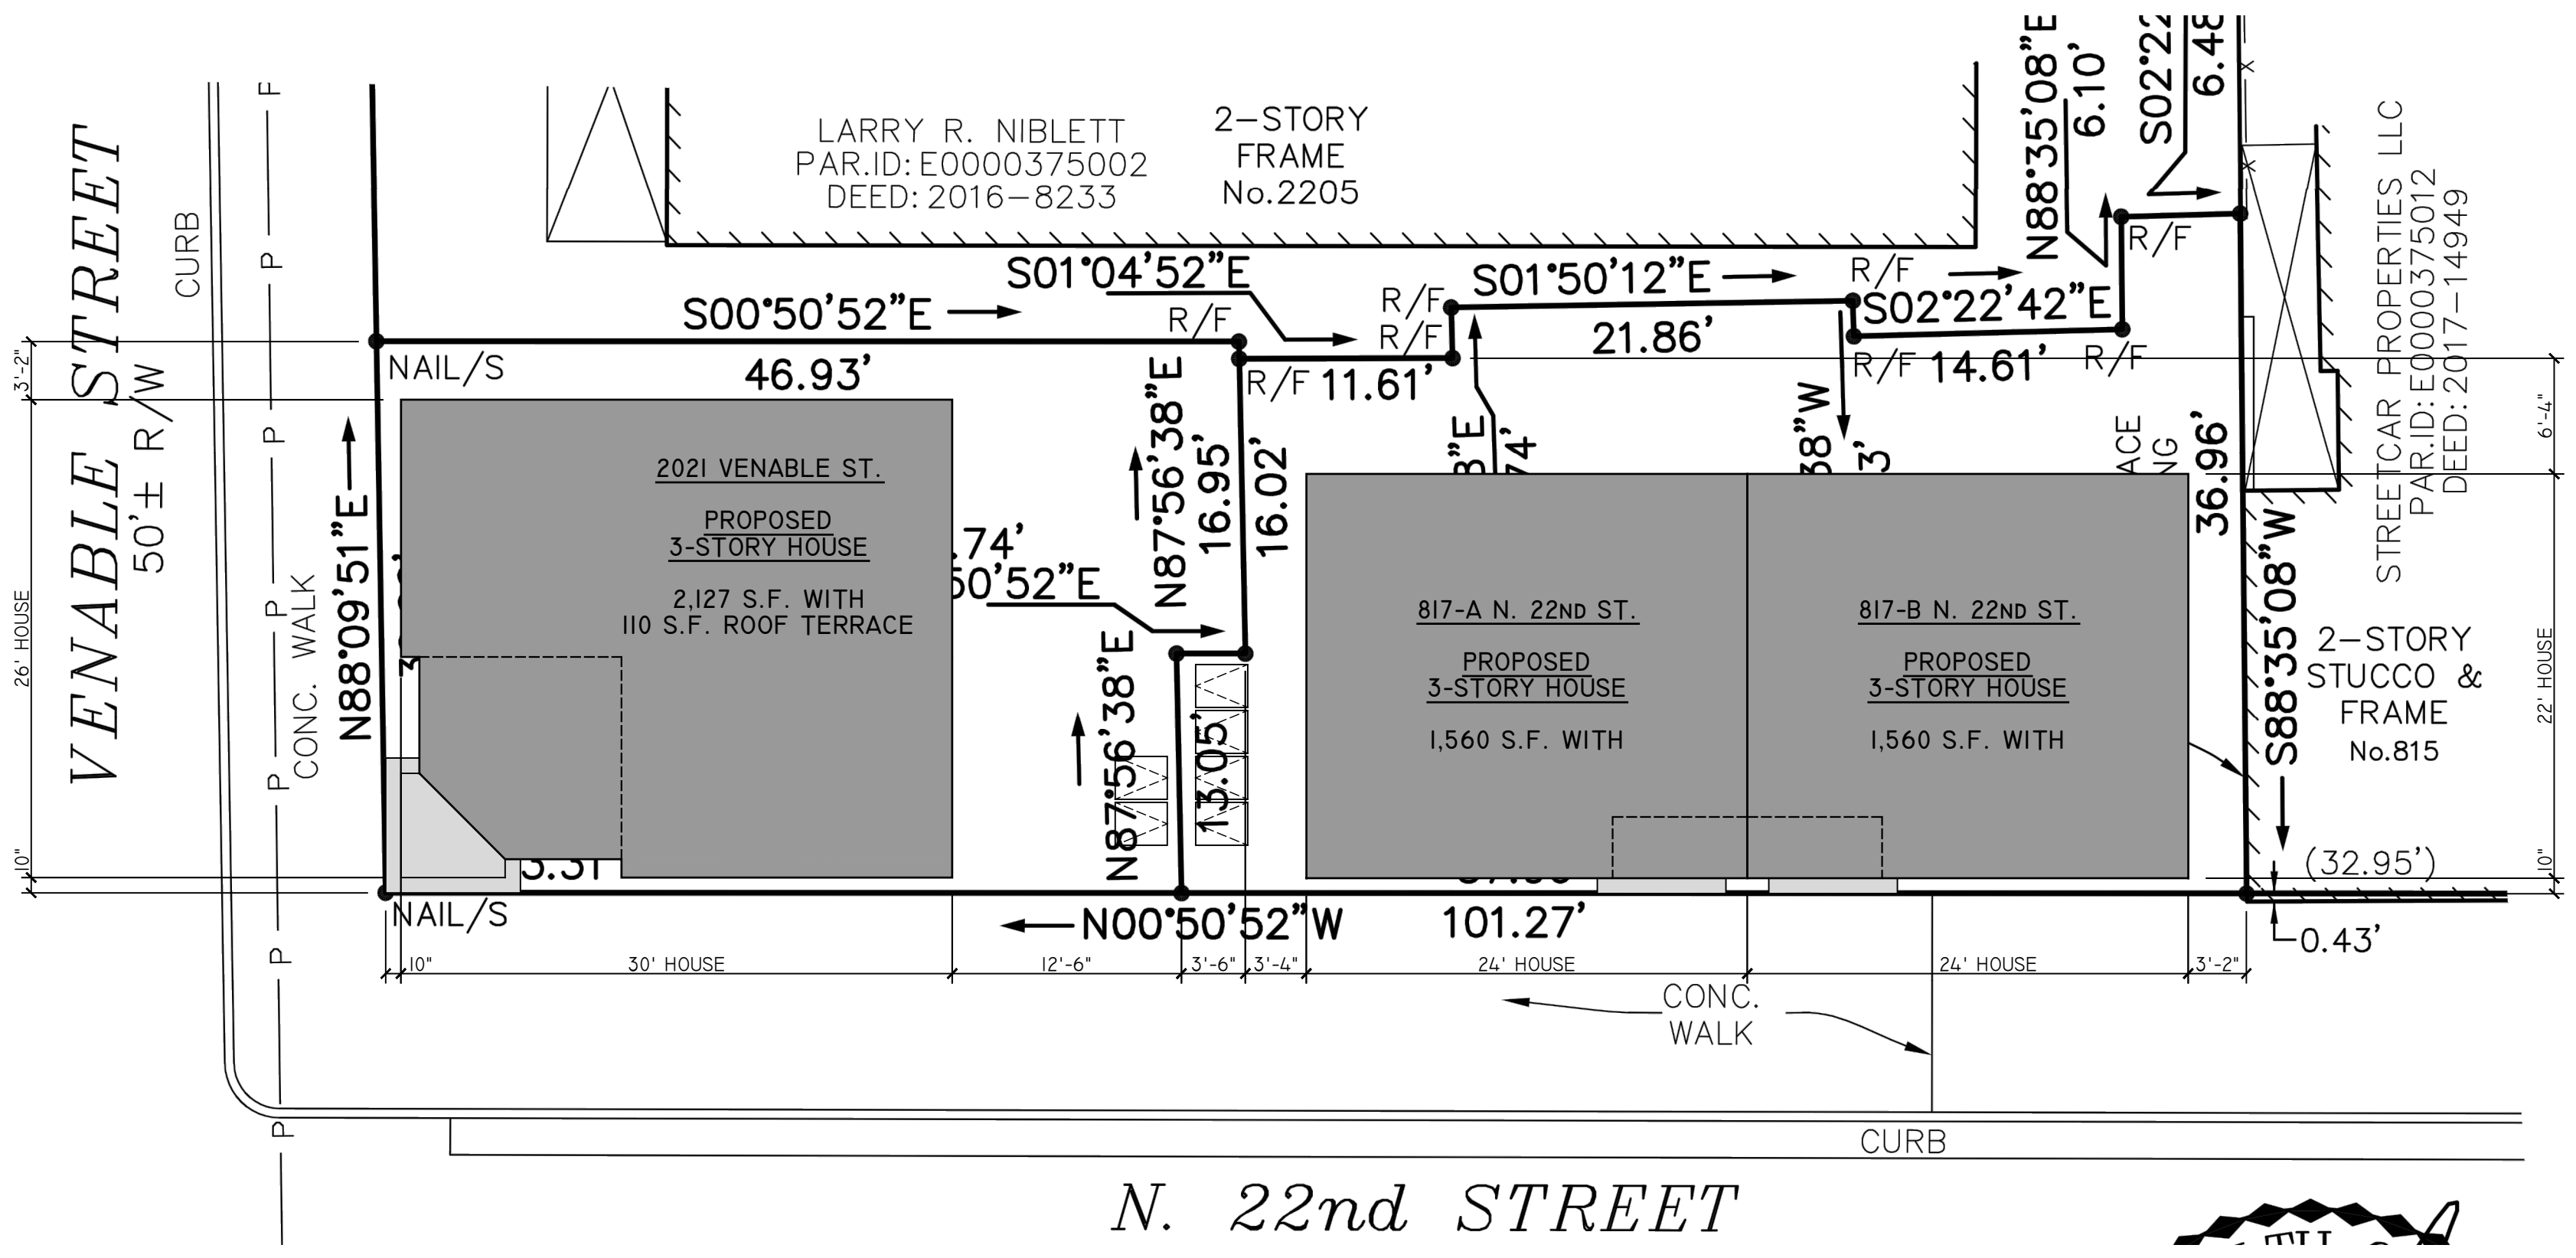

**Requirements:** A complete application includes all applicable information requested on checklists available on the CAR website to provide a complete and accurate description of existing and proposed conditions, as well as payments of the application fee. Applications proposing major new construction, including additions, should meet with staff to review the application and requirements prior to submitting. Owner contact information and signature is required. Late or incomplete applications will not be considered.

**Zoning Requirements:** Prior to Commission review, it is the responsibility of the applicant to determine if zoning approval is required. Application materials should be prepared in compliance with zoning.

**RE: Certificate of Appropriateness at 2201 Venable Street & 817 N 22<sup>nd</sup> Street**

Members of the Commission,

This memorandum shall serve as the applicant's statement for an application to be reviewed by the Commission of Architectural Review (the "CAR") for the proposed construction of three new single-family dwellings configured as one single-family detached dwelling on the property known as 2201 Venable Street and two single-family attached dwellings on the property known as 817 N 22<sup>nd</sup> Street (the "Property").

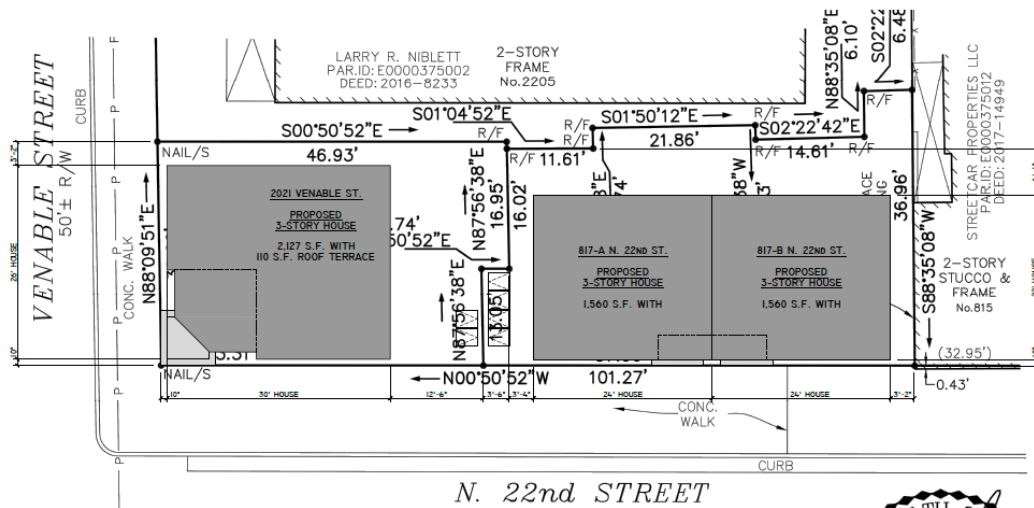

The Property is located at the corner of Venable and N 22<sup>nd</sup> Streets and lies in Richmond's Union Hill City Old and Historic District. Existing structures in the district are noted as being known for a variety of architectural styles and materials as well as a range of land uses. The Property is currently undeveloped and is adjacent to a single-family detached dwelling to the west along Venable Street and a two-family detached ("duplex") dwelling to the rear fronting N 22<sup>nd</sup> Street.

The Property owner is proposing to construct a total of three, single-family dwellings on the Property. A single-family detached dwelling, addressing the corner of Venable and N 22<sup>nd</sup> Street would be located on the parcel at 2201 Venable while two, single-family attached dwellings would front onto N 22<sup>nd</sup> Street at 817 N 22<sup>nd</sup>. These would each be three stories in height with small third-floor terrace addressing the corner of Venable and N 22<sup>nd</sup> on the

detached dwelling. The dwellings each feature a simplified Italianate-style design with small front stoops and with stylized cornice-lines to provide compatibility with historic homes nearby.

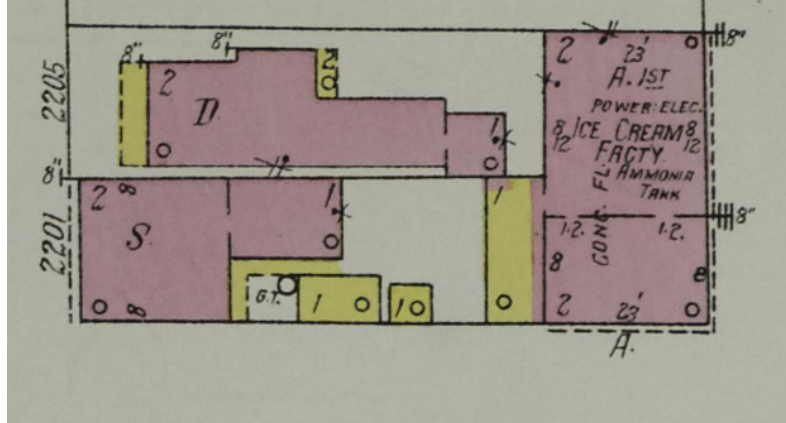

Each of these dwellings would each contain 3 bedrooms and 2 ½ bathrooms with roughly 2,127 square feet of finished floor area at 2201 Venable and 1,560 square feet of finished floor area for the dwellings on 817 N 22<sup>nd</sup>. The dwellings have been designed with a floorplan which offers a living area and kitchen on the first floor and have been designed to meet the needs of the market with primary bedrooms with walk-in closets and en suite bathrooms.

**Siting:**

According to the 1925 Sanborn Map, the Property was historically a single lot occupied with a two-story building located at the Venable and N 22<sup>nd</sup> property lines.

The 1952 Sanborn map shows the parcel being further improved with a series of frame and brick buildings along the N 22<sup>nd</sup> Street Frontage.

The siting of the proposed dwellings is consistent with the historic use of the Property and the development pattern in the area. The dwelling located at the corner of Venable and N 22<sup>nd</sup> with the front entrance facing the corner and dwellings located to the rear fronting N 22<sup>nd</sup> is consistent with the historical use of the Property.

**Form:**

The proposed dwellings have been designed to reflect the historic lot configuration of the Property and to be consistent with traditional row house forms found in the area. The proposed Italianate design was created to meet the CAR Guidelines and have been approved elsewhere in the Union Hill and other City Old and Historic Districts.

Attached dwellings can be found along Venable Street and throughout the Union Hill district. The proposed dwellings feature a design which appeals to the current homebuyer along with details which reflect the historic nature of the neighborhood. Each dwelling would include simplified versions of traditional details which can be found in the neighborhood such as transom windows above the front door and front stoops with flat roofs.

**Scale:**

The proposed construction of the new dwelling is consistent with the scale and character of the proposed site layout and existing neighborhood and will appear appropriate from street level. Dwellings in the area are of a range of heights with three story dwellings located nearby along Cedar Street.

The proposed density is also consistent with the historic use of corner parcels within Union Hill. For example, the 1952 Sanborn map shows the property across N 22<sup>nd</sup> Street (2121 Venable/816 N 22<sup>nd</sup>) as being occupied with a dwelling fronting Venable Street, a “duplex’ fronting N 22<sup>nd</sup> Street, and accessory outbuildings.

**Height, Width, Proportion, & Massing**

At three stories, the proposed dwellings are comparable in height with other structures on the block. The massing provides an appropriate transition from the single family attached and detached dwellings fronting Venable to the duplex located to the rear of the subject parcel at 815 N 22<sup>nd</sup>.

**Exterior Cladding/Doors and Windows/Materials**

Exterior cladding, doors and windows, foundation, and roofing are as noted on the attached plans. The items were selected to be consistent with CAR requirements and other dwellings within the Union Hill Old and Historic District. A finish schedule including doors and windows is provided for the proposed dwellings.

The proposed design is compatible with the historical fabric of the block as it recognizes the siting, scale, form, and massing of the contributing structures on the block. As noted by the *CAR's Handbook and Design Review Guidelines*, the Union Hill City Old and Historic District is characterized by a wide variety of architectural styles. The proposed dwellings provide modern architectural style offering new and desirable housing opportunities within the area while remaining consistent with the fabric of the historic district. Furthermore, many of the design elements of the proposed dwellings can be found on historically significant dwellings throughout the Union Hill district. The proposed single-family dwellings address the unique considerations of the lot size, shape, and underlying zoning while also acknowledging the historical characteristics of the Union Hill Neighborhood.

We thank you for the care and assistance in reviewing our application. Should you have any questions after reviewing this request, please feel free to contact me at [will@bakerdevelopmentresources.com](mailto:will@bakerdevelopmentresources.com) or (864) 377-9140.

Sincerely,
