## Introduction

The applicant is requesting a special use permit (the "SUP") for the property known as 602 W 26<sup>th</sup> Street (the "Property"). The SUP would authorize the division of the Property and construction of a single-family detached dwelling on the vacant portion of the parcel. While the single-family detached use is permitted by the underlying R-6 Single-Family Attached Residential zoning district, some of the underlying features cannot be met, and therefore, the SUP is required.

## Existing Conditions

### SITE DESCRIPTION AND EXISTING LAND USE

The Property is located along the eastern line of W 26<sup>th</sup> Street between Stonewall and Springhill Avenues and is referenced by the City Assessor with a tax parcel number of S000-0804/008. It is approximately 56 feet in width and 148 feet in depth containing roughly 9,176 square feet of lot area. The Property is currently occupied with a two-story, two-family detached dwelling on the southern portion of the parcel. Access is provided at the rear by means of a north-south alley.

The properties in the vicinity are primarily developed with single- and two-family detached dwellings ranging from one to two stories in height and constructed of a range of form and materials.

## EXISTING ZONING

The Property and the surrounding properties in the block and further south are zoned R-6. To the north, across Stonewall Avenue and further west and east are properties zoned R-5 Single-Family Residential. Parcels in the area differ in size and frontage with many parcels in the vicinity reflecting the historic Woodlan Heights Subdivision lot pattern and unable to conform to the underlying R-6 lot width and/or area requirements.

## MASTER PLAN DESIGNATION

The request is consistent with the Richmond 300 Master Plan (the “Master Plan”), which suggests “Residential” for the Property. The Master Plan suggests this future land use designation allow for a variety of housing types that are consistent with the scale, density, and design of what exists in the vicinity. This designation also encourages developments to reinforce a gridded street pattern in order to increase connectivity. Single-family dwellings are the contemplated primary use in the Residential future land use designation (p. 54).

In addition to the Property-specific guidance offered by the Vision and Core Concepts chapter, there are a number of other goals elsewhere within the Master Plan that support this request:

- Page 109 (Equitable Transportation Chapter), Objective 6.1 to “Increase the number of residents and jobs at Nodes and along enhanced transit corridors in a land development pattern that prioritizes multi-modal transportation options.”
  - b. Develop housing at all income levels in and near Nodes and along major corridors (see strategies Goal 14).
- Page 136 (Diverse Economy Chapter), Objective 11.1 to “Increase the areas of appropriately zoned land near various transportation modes and housing to retain, create, and attract employers.”
  - d. Encourage the development of a variety of quality housing types to house employees across the economic spectrum (see Goal 14).
- Page 150 (Inclusive Housing Chapter), Objective 14.1 to “Increase city-wide awareness of the importance of integrating housing at all income levels into every residential neighborhood so every household has housing choice throughout the city.”
- Page 152 (Inclusive Housing Chapter) (see map on p. 153), Objective 14.5 to “Encourage more housing types throughout the city and greater density along enhanced transit corridors and at Nodes (shown in Figure 38 [p.153]) by amending the Zoning Ordinance. “
- Page 159 (Thriving Environment Chapter) Objective 15.1 to “Reduce air pollution related to transportation.”
  - a. Increase the number of Richmonders living in a development pattern that encourages density and reduces dependency on single-occupancy vehicles (see Goal 1, Goal 8, Goal 14).
- Page 86 (High-Quality Places Chapter), Objective 1.4, to “maintain and improve primarily residential areas by increasing their linkages to...corridors...and maintaining high-quality design standards”

# Proposal

## PURPOSE OF REQUEST

The SUP would permit the division of the Property into two lots and the construction of a single-family detached dwelling the newly created parcel. The new lot would each be 26 feet in width and contain approximately 3,878 square feet of lot area. While this lot width and area is consistent with the historic development pattern of the block and the existing parcels within the neighborhood, the proposed lot widths do not permit the proposed dwellings to meet the R-6 District lot area and width requirements, and therefore, a SUP is required.

## **PROJECT DETAILS/DESIGN**

The proposed single-family dwelling would each be approximately 20 feet in width, 62 feet in depth, two stories in height, and include approximately 2,444 square feet of finished floor area. The dwelling would consist of four bedrooms and three and one-half bathrooms with modern and efficient floor plans designed to meet the needs of the market. All dwellings would be clad in cementitious lap siding to ensure quality and durability, and two off-street parking spots would be provided at the rear of the Property, accessible from the alley.

## **Findings of Fact**

The following are factors indicated in Section 17.11 of the Charter and Section 30-1050.1 of the Zoning Ordinance relative to the approval of special use permits by City Council. The proposed special use permit will not:

- ***Be detrimental to the safety, health, morals and general welfare of the community involved.***

The proposed SUP for high-quality infill construction will not impact the safety, health, morals and general welfare of the nearby neighborhoods.

- ***Tend to create congestion in streets, roads, alleys and other public ways and places in the area involved.***

The proposed SUP will not result in significant traffic impacts to nearby residential neighborhoods. The negligible traffic generation and two proposed off-street parking spaces for the dwellings will create no congestion on streets, roads, alleys or any other public right of way.

- ***Create hazards from fire, panic or other dangers.***

The property will be developed in a manner consistent with the requirements of the building code and in accordance with the requirements of Fire and Emergency Services. The City's codes applicable to this development are designed to eliminate such hazards.

- ***Tend to overcrowding of land and cause an undue concentration of population.***

The proposed SUP will not tend to over crowd the land or create an undue concentration of population.

- *Adversely affect or interfere with public or private schools, parks, playgrounds, water supplies, sewage disposal, transportation or other public requirements, conveniences, and improvements.*

The proposed SUP would not adversely affect the above referenced City services.

- *Interfere with adequate light and air.*

The light and air available to the subject and adjacent properties will not be affected. The proposed buildings are of compatible massing and spacing to the existing in the vicinity and normal side yard setbacks would be met. As a result, this request will not interfere with the provision of adequate light and air to the adjacent buildings.

## Summary

In summary we are enthusiastically seeking approval for the construction of a single-family dwelling on the vacant portion of the Property. The SUP represents an ideal, small-scale urban infill development for this location that would meet the needs of today's market. This dwelling provides updated housing opportunities for the neighborhood and is consistent with the goals of the Richmond 300 Master Plan. In exchange for the SUP, the quality assurances conditioned therein would guarantee the construction of high-quality residences consistent with Master Plan guidance.
