Introduction

The property owner is requesting a special use permit (the “SUP”) for 1103 and 1105 Carlisle Avenue (the “Property”). The SUP would authorize the division of the Property in order to construct a total of two new single-family detached dwellings, with one new dwelling located on each of the current parcels. While the single-family detached use is permitted by the underlying R-5 Single-Family Residential zoning district, some of the R-5 feature requirements cannot be met, and therefore, a SUP is required.

Existing Conditions

SITE DESCRIPTION AND EXISTING LAND USE

The subject Property is located on the southern line of Carlisle between Union and Tompkins Streets. 1103 and 1105 Carlisle Avenue are referenced by the City Assessor as tax parcels E000-2174/018 and E000-2174/019 respectively and are each 61.61’ in width containing 7,395 square feet of lot area. Each parcel is currently in the process of being developed with a by-right single-family detached dwelling on the western portion of the parcel. Access is provided via an east-west alley located to the rear of the Property.

The properties in the vicinity are primarily developed with single-family detached dwellings of a range of forms and materials. Further west lies two large multifamily buildings which also contain a range of other uses beyond which lies Powhatan Hill Park.

EXISTING ZONING

The Property and those in the immediate area are zoned R-5 Single-Family Residential which permits the proposed single-family detached use. One block to the north lies a R-6 Single Family Attached Residential District. Several Board of Zoning Appeals and SUP approvals can also be found in the vicinity.

TRANSPORTATION

Located less than a five-minute walk from the Property, is the Williamsburg + Northampton bus stop which serves the 4B bus line which runs every 30 minutes and connects with the Pulse BRT providing connectivity throughout the City.

MASTER PLAN DESIGNATION

The request is consistent with the Richmond 300 Master Plan (the “Master Plan”), which suggests “Residential” for the Property. The Master Plan suggests this future land use designation allow for a variety of housing types that are consistent with the scale, density, and design of what exists in the vicinity. This designation also encourages developments to reinforce a gridded street pattern in order to increase connectivity. Single-family dwellings are the contemplated primary use in the Residential future land use designation (p. 54).

In addition to the Property-specific guidance offered by the Vision and Core Concepts chapter, there are a number of other goals elsewhere within the Master Plan that support this request:

- Page 136 (Diverse Economy Chapter), Objective 11.1 to “Increase the areas of appropriately zoned land near various transportation modes and housing to retain, create, and attract employers.”
 - d. Encourage the development of a variety of quality housing types to house employees across the economic spectrum (see Goal 14).
- Page 159 (Thriving Environment Chapter) Objective 15.1 to “Reduce air pollution related to transportation.”
 - a. Increase the number of Richmonders living in a development pattern that encourages density and reduces dependency on single-occupancy vehicles (see Goal 1, Goal 8, Goal 14).
- Page 86 (High-Quality Places Chapter), Objective 1.4, to “maintain and improve primarily residential areas by increasing their linkages to...corridors...and maintaining high-quality design standards”

Proposal

PROJECT SUMMARY

The proposed development includes the division of the Property into a total of four parcels and the construction of two single-family detached dwellings on the two newly created lots. Each parcel is currently being developed with a by-right single-family dwelling.

PURPOSE OF REQUEST

The Property consists of a two lots of record each with 61.61' of frontage and containing 7,795 square feet of lot area for a total of 123.22' of frontage along Carlisle Avenue and 14,790 square feet of lot area. Each parcel is currently being developed with a single-family detached dwelling, as permitted by the underlying zoning. The owner is now proposing to divide each lot and construct one new single-family detached dwelling on each new parcel. As the proposal does not meet some of the feature requirements prescribed by the underlying R-5 zoning district, including lot area and width, a special use permit is required.

PROJECT DETAILS

When complete, the new single family detached dwellings would be two-stories in height and would utilize design features found in nearby homes to be consistent with the existing dwellings found throughout the neighborhood. The dwellings utilize a traditional design, consistent with other dwellings nearby and including design features, like the gabled roof and full width porch which are found in the neighborhood.

The dwelling would each contain four bedrooms and two-and-one-half bathrooms. Each dwelling has been designed to meet the needs of today's homebuyer with open living spaces, spacious kitchens and primary bedroom suites with en-suite bathrooms. The dwellings would be constructed of high-quality materials including cementitious siding to ensure quality and durability. Off-street parking, accessible from the alley, would be provided for each dwelling.

Findings of Fact

The following are factors indicated in Section 17.11 of the Charter and Section 114-1050.1 of the Zoning Ordinance relative to the approval of special use permits by City Council. The proposed special use permit will not:

- ***Be detrimental to the safety, health, morals and general welfare of the community involved.***

The proposed special use permit for high-quality infill construction will not impact the safety, health, morals and general welfare of the nearby neighborhoods.

- ***Tend to create congestion in streets, roads, alleys and other public ways and places in the area involved.***

The proposed special use permit will not result in significant traffic impacts to nearby residential neighborhoods. The negligible traffic generation and proposed off-street parking will create no congestion on streets, roads, alleys or any other public right of way.

- ***Create hazards from fire, panic or other dangers.***

The property will be developed in a manner consistent with the requirements of the building code and in accordance with the requirements of Fire and Emergency Services. The City's codes applicable to this development are designed to eliminate such hazards.

- ***Tend to overcrowding of land and cause an undue concentration of population.***

The proposed special use permit will not tend to over crowd the land or create an undue concentration of population.

- ***Adversely affect or interfere with public or private schools, parks, playgrounds, water supplies, sewage disposal, transportation or other public requirements, conveniences and improvements.***

The special use permit would not adversely affect the above referenced City services. To the contrary, the proposal would provide positive fiscal (tax) benefits that would enhance the City's ability to provide these services to the proposed development.

- ***Interfere with adequate light and air.***

The light and air available to the subject and adjacent properties will not be affected. The proposed buildings are of compatible massing and spacing to the existing in the vicinity. Furthermore, the provision of a full-width front porch will provide additional usable outdoor space. As a result, this request will not interfere with the provision of adequate light and air to the adjacent buildings.

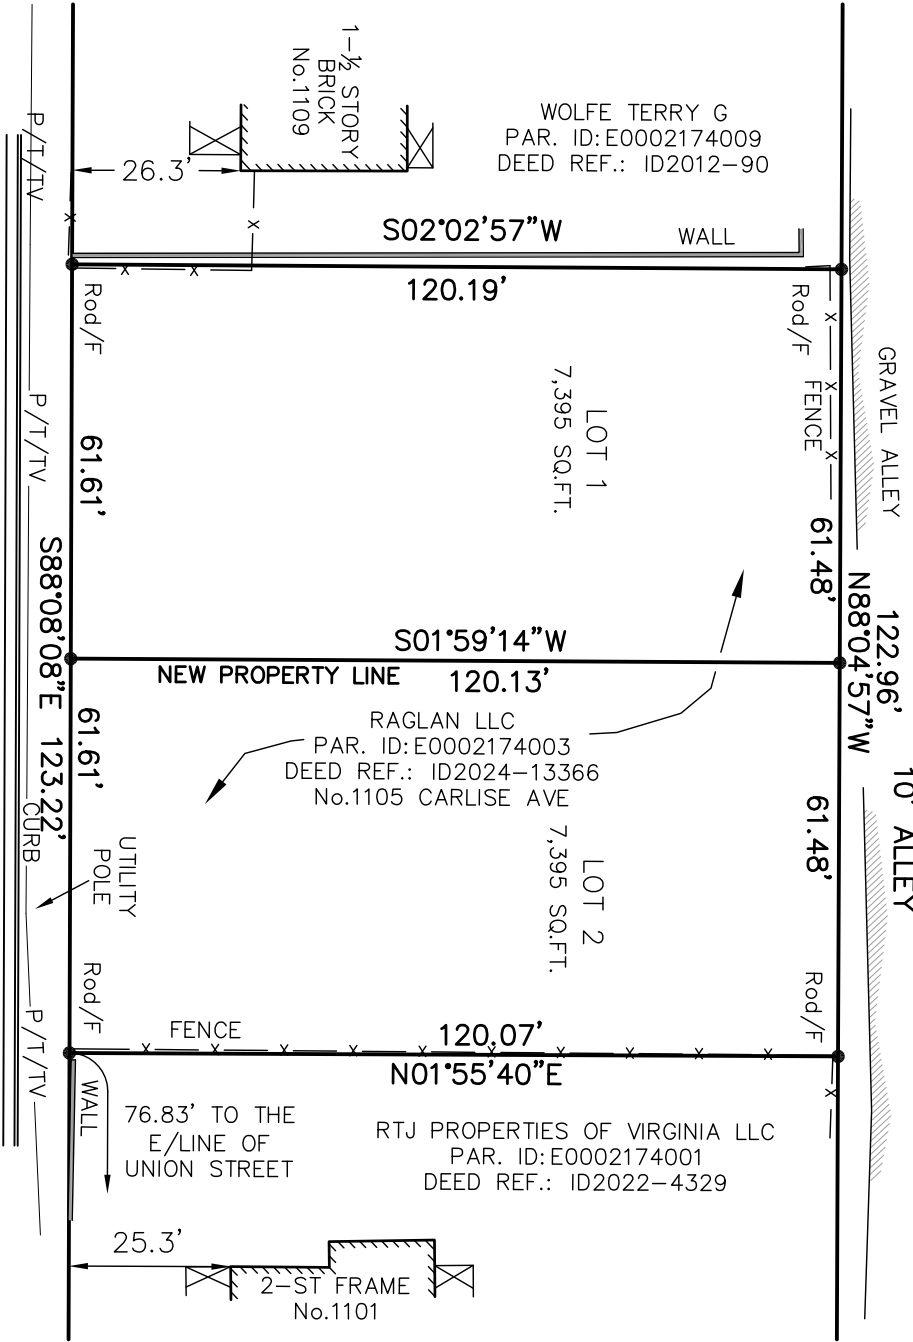

Summary

In summary we are enthusiastically seeking approval for the construction of the proposed single-family detached dwellings. The dwellings have been thoughtfully designed to provide appropriate, high-quality residences in the neighborhood. The request offers compatibility with the City's Master Plan in terms of use as well as helping encourage a pedestrian friendly traditional streetscape in the block and contribute to the vibrancy of the

block though the addition of street life in the form of a street-oriented front porch. Finally, the quality assurances conditioned through the SUP would guarantee a higher quality development than might otherwise be developed by right.
