Re: 3301-3303 Park Avenue – Special Use Permit Amendment

Matthew,

I am pleased to serve as Architect for Park-Tilden LLC's Special Use Permit Amendment. Working within the existing SUP for 3301-3303 Park Avenue, adopted December 12th, 2022, the amended design meets all written conditions of the existing ordinance. It also uses the same site plan, off-street parking layout, setbacks, heights, and adjacent architectural alignments (porches, cornices, etc.) identified in the ordinance drawings. Additionally, the materials are intended to be consistent from the previous iteration; notably brick on the primary facades and horizontal siding for the rear of the buildings. The revised drawing submission includes the original civil plans which were only modified in a non-material way to accurately portray the new interior layout within the units themselves. The perspectives, plans, and elevations are presented in the same format as the existing ordinance drawings to facilitate a comparative understanding of the revised design.

The motivation for the compositional changes in the design stems from an effort to reflect and extend the character of the Museum District neighborhood. The primary exterior change to the front façades was replacing third floor balconies with dormers that are appropriately scaled for the massing. Additionally, the side façades were simplified and flattened using brick to match the few neighborhood homes that have had a full third floor buildout. Optional chimneys have been added for gas fireplaces, and the optional elevator roof access penthouses remain unchanged from the original ordinance. The architectural detailing of columns, entablatures, jack arches, brick corbels, etc., have been inspired by various homes in the neighborhood. The revised design, while adhering to the existing ordinance, massing, and project development goals, intends to fit contextually within the existing urban fabric of the Museum District.

Sincerely,

Timothy Hayes, AIA
