HENRICO VA 23233-1007  
Dept: 804-360-4669

DOS 9/16/22

To Whom it may Concern:

I am one of the treating physicians for Melvin Jones Jr. DOB 12/11/1954 where I help manage his chronic pain and disability. He recently had lumbar spine surgery and is followed closely by VCU Neurosurgery. It is my recommendation that he not lift more than 15 pounds at this time as this could negatively impact his pain and potentially worsen his condition. It is medically necessary for him to receive assistance with any physical work that would require significant lifting, twisting, bending and stooping. Please do not hesitate to contact me with further questions.

Sincerely,

Aaron M. Jones MD
