Land Use Administration  
Department of Planning & Development Review  
City of Richmond  
900 E. Broad Street, Room 511  
Richmond, Virginia 23219

**Re: UDC Conceptual Submission – Approval Letter Conditions & Responses  
New George Wythe High School  
Richmond Public Schools (“RPS”)**

Dear Mr. Roakes:

RRMM Architects (“RRMM”) is pleased to provide the following responses to the conditions of approval provided by the City of Richmond Planning Commission on October 3, 2022, following our conceptual Urban Design Committee (UDC) submission;

**Approved Conditions & Responses**

No.	Comments
1	Staff recommends that final details on outdoor lighting be sensitive to light pollution or dark-skies compliant.  <i>Response: All parking lot and walkway pole mounted lighting and building mounted lighting is full cut off, dark-skies compliant (see attached proposed lighting product information sheets). Athletic field lighting has been designed to reduce spill and glare to every extent possible (see attached proposed athletic field lighting product information sheets).</i>
2	Staff recommends inclusion of permeable hardscape materials and sustainable stormwater features, where appropriate, and as suggested by the Urban Design Guidelines.  <i>Response: No permeable hardscape is proposed due to the extensive amount of maintenance that would be incurred by Richmond Public Schools. Stormwater management is provided for the site and is all underground due to the density of the site layout. Additional sustainable features are included within the design for our LEED certification.</i>
3	Staff recommends that the re-use of existing materials onsite should be incorporated with the design plans, where feasible.  <i>Response: Contractor is required to re-use existing materials according to our LEED Project Specifications.</i>
4	Staff recommends that a maintenance plan be submitted during the Final UDC review phase to include landscaping, sustainability features, and public spaces.  <i>Response: Site maintenance guidelines have been outlined on Sheet L3.01 in the submitted drawings by season and by plant type. Maintenance notes provide a general overview of best practices to follow for soils, plants, paving, and drainage</i>

	<i>areas. As noted, this outline should not be considered comprehensive, and priorities should be adjusted by grounds management staff based on real-time needs.</i>
5	Staff recommends the applicant incorporate public art, where feasible. <i><u>Response:</u> RPS is exempt from this City requirement and does not plan to incorporate public art as a part of this project, at this time. However, given that George Wythe High School is a "School for the Arts", possible locations/areas on the site have been discussed with RPS for the potential future display of art created by GWHS students.</i>
6	Staff recommends that the Applicant further improve the architectural façade facing Midlothian Turnpike to reflect the high traffic carried by that right-of-way, for submission of the final Architectural Plans. <i><u>Response:</u> Architectural elements (i.e. windows, glazing and metal paneling) and material dimensioning have been modified to improve the prominence of the façade features facing Midlothian Turnpike.</i>
7	Staff recommends that the Applicant show proposed screen wall that shields maintenance areas from view off Midlothian Turnpike on Final Site Plan submission. <i><u>Response:</u> Screen wall (brick with cast stone cap to match building) and landscaping have been added to shield service yard area.</i>
8	Staff recommends that the Applicant increase visibility from the street to the proposed basketball court for the submission of the Final Site Plan. <i><u>Response:</u> Proposed basketball court has been shifted on the site closer to Crutchfield Street providing increased visibility.</i>
9	Staff recommends that the applicant provide appropriate pedestrian markings and signage where walkways cross internal drive isles and the parking lot for the submission of the Final Site Plan. <i><u>Response:</u> Pavement markings have been incorporated at pedestrian walkways crossing internal drive isles in parking lots.</i>
10	Staff recommends that the applicant improve sidewalk width along the main entrance and drop-off/pickup area facing Crutchfield Street for the submission of the Final Site Plan. <i><u>Response:</u> Sidewalk width along main entrance and drop-off/pick-up area facing Crutchfield has been widened. See revised plans.</i>
11	Staff recommends that Applicant improve pedestrian access to the street to the main entrance along Crutchfield Street for the submission of the Final Site Plan. <i><u>Response:</u> Additional connections have been provided including an ADA accessible sidewalk to the main entrance along Crutchfield Street. See Sheet C2 for locations.</i>

12	Staff recommends that the Applicant work with GRTC to provide and coordinate improvements to the bus stops located adjacent to the site.  <i>Response: Communication with GRTC remains ongoing to fully understand their needs for this area. Final locations will be coordinated between GRTC, A/E and General Contractor in the field during construction.</i>
13	Staff recommends that the Applicant work with GRTC to relocate the existing bus stop locations to better reflect the proposed site layout to avoid vehicle/pedestrian conflicts as well as increased pedestrian connectivity to the site.  <i>Response: Communication with GRTC remains ongoing to fully understand their needs for this area. Final locations will be coordinated between GRTC, A/E and General Contractor in the field during construction.</i>
14	Applicant to show bike parking located near the main entrance along Crutchfield Street for the submission of the Final Site Plan.  <i>Response: Bike parking has been added/located at both the main entrance along Crutchfield Street and the rear entrance along Midlothian Turnpike. See Sheet C2 for locations.</i>
15	Staff recommends that the Applicant consider and detail extreme weather response for final submission.  <i>Response: George Wythe HS does not plan to be a pre- or post-event shelter. However, RPS does plan to utilize the school as a centralized location for the distribution of resources (i.e. boxed meals, water, blankets, etc.) needed by the community at the conclusion of an event.</i>

If you should have any questions and/or comments, please do not hesitate to contact us.

Sincerely,  
**RRMM Architects PC**

Mark W. Probst  
Deputy CEO  
Principal

cc: Dana Fox (RPS), Jeff Harris (RRMM)

# SITE LIGHTING FIXTURES (PRODUCT INFORMATION SHEETS)

## Lumark

### Prevail Discrete LED

Area / Site Luminaire

#### Product Features

#### Product Certifications

#### Interactive Menu

- Ordering Information page 2
- Mounting Details page 3, 4
- Optical Configurations page 5
- Product Specifications page 5
- Energy and Performance Data page 6, 7
- Control Options page 8

#### Quick Facts

- Direct-mounted discrete light engine for improved optical uniformity and visual comfort
- Lumen packages range from 4,300 - 68,000 nominal lumens (30W - 550W)
- Replaces 70W up to 1,000W HID equivalents
- Efficacies up to 157 lumens per watt
- Standard universal quick mount arm with universal drill pattern

#### Connected Systems

- WaveLinx

#### Dimensional Details

#### NOTES:

1. Visit <https://www.designlights.org/search/> to confirm qualification. Not all product variations are DLC qualified.
2. IDA Certified for 3000K CCT and warmer only.

## NOTES:

- DesignLights Consortium® Qualified. Refer to [www.designlights.org](http://www.designlights.org) Qualified Products List under Family Models for details.
- Customer is responsible for engineering analysis to confirm pole and fixture compatibility for applications. Refer to installation instructions and pole white paper WP513001EN for additional support information.
- Only product configurations with these designated prefixes are built to be compliant with the Buy American Act of 1933 (BAA) or Trade Agreements Act of 1979 (TAA), respectively. Please refer to [DOMESTIC.PREFERENCES](http://DOMESTIC.PREFERENCES) website for more information. Components shipped separately may be separately analyzed under domestic preference requirements.
- Nominal drive currents shown here. For actual drive current by configuration, refer to Power and Lumens tables.
- 480V not to be used with ungrounded or impedance grounded systems.
- DuraVolt drivers feature added protection from power quality issues such as loss of neutral, transients and voltage fluctuations. Visit [www.signify.com/duravolt](http://www.signify.com/duravolt) for more information.
- House Side Shield not for use with 5WQ distribution.
- Not available with PA1D light engine in Petite housing (PRV-P).
- If High Voltage (H) or DuraVolt (DV) is specified, use a photocontrol that matches the input voltage used.
- Controls system is not available in combination with a photocontrol receptacle (PR or PR7) or another controls system (MS, SPB, ZD, or ZW).
- Option not available with High Voltage (H) or DuraVolt (DV). Must specify Universal (U), 347V (9), or 480V (8) voltage.
- Utilizes the Wattstopper sensor FSP-211. Sensor color white unless specified otherwise via PDR. To field-configure, order FSIR-100 accessory separately.
- Utilizes the Wattstopper sensor FSP-3XX series. Sensor color determined by product finish. See Sensor Color Reference Table. Field-configures via mobile application. See Controls section for details.
- Sensor passive infrared (PIR) may be overly sensitive when operating below -20°C (-4°F).
- In order for the device to be field-configurable, requires WAC Gateway components WAC-PoE and WPOE-120 in appropriate quantities. Only compatible with WaveLinx system and software and requires system components to be installed for operation. See website for more Wavelinx application information.
- Replace XX with sensor color (WH, BZ or BK).
- Only available in PRV-XL configurations.
- Not available with High Voltage (H, DV, 8 or 9) or HA options. Consult LumenSafe system product pages for additional details and compatibility information.
- Replace XX with paint color.
- For BAA or TAA requirements, Accessories sold separately will be separately analyzed under domestic preference requirements. Consult factory for further information.
- Not for use with PRV-XL or PRV-M configurations.
- Only for use with PRV. Not applicable to PRV-M, PRV-XL, or PRV-P.
- Must order one per optic/LED when ordering as a field-installable accessory (1, 2, 3, 4, or 6). Refer to House Side Shield reference table for details.
- This tool enables adjustment to Motion Sensor (MS) parameters including high and low modes, sensitivity, time delay, cutoff and more. Consult your lighting representative for more information.
- Requires 4-PIN twistlock receptacle option (ZD or ZW) option.
- Requires 7-PIN NEMA twistlock photocontrol receptacle (PR7) option. The WOLC-7 cannot be used in conjunction with other controls systems (MS, ZD, ZW or LWR). Only for use at 120-347V.
- Only available for PRV-M configurations.
- Only for use with PRV-XL and PRV-M configurations. Not applicable to PRV or PRV-P.
- Adjustable Arms QM for PRV-P, PRV, PRV-XL; Fixed for PRV-M
- Coastal construction finish salt spray tested to over 5,000-hours per ASTM B117, with a scribe rating of 9 per ASTM D1654.

## Product Specifications

### Construction

- Single-piece die-cast aluminum housing
- Tethered die-cast aluminum door

### Optics

- Dark Sky Approved (3000K CCT and warmer only)
- Precision molded polycarbonate optics

### Electrical

- 40°C minimum operating temperature
- 40°C maximum operating temperature
- >.9 power factor
- <20% total harmonic distortion
- Class 1 electronic drivers have expected life of 100,000 hours with <1% failure rate
- 0-10V dimming driver is standard with leads external to the fixture
- Standard MOV surge protective device designed to withstand 10kV of transient line surge

### Mounting

- Versatile, patented, standard mount arm accommodates multiple drill patterns ranging from 1-1/2" to 4-7/8" (Type M drilling recommended for new installations)
- A knock-out on the standard mounting arm enables round pole mounting
- Adjustable pole and wall mount arms adjust in 5° increments from 0° to 60°; Downward facing orientation only (Type N drilling required for ADJA mount)
- Adjustable slipfitter arm adjusts in 5° increments from -5° to 85°; Downward facing orientation only
- Prevail and Prevail Petite: 3G vibration rated (all arms)
- Prevail XL Mast Arm: 3G vibration rated
- Prevail XL Standard Arm: 1.5G vibration rated
- Adjustable Arms: 1.5G vibration rated

### Finish

- Five-stage super TGIC polyester powder coat paint, 2.5 mil nominal thickness
- Finish is compliant to 3,000 hour salt spray standard (per ASTM B117)

### Typical Applications

- Parking lots, Walkways, Roadways and Building Areas

### Shipping Data

- Prevail Petite: 18 lbs. (7.94 kgs.)
- Prevail: 20 lbs. (9.09 kgs.)
- Prevail XL: 45 lbs. (20.41 kgs.)
- Prevail Maxx: 49 lbs. (22.23 kgs.)

### Warranty

- Five year limited warranty, consult website for details. [www.cooperlighting.com/legal](http://www.cooperlighting.com/legal)

## Control Options

**0-10V** This fixture provides 0-10V dimming wire leads for use with a lighting control panel or other control method.

**Photocontrol** (PR and PR7) Photocontrol receptacles provide a flexible solution to enable “dusk-to-dawn” lighting by sensing light levels. Advanced control systems compatible with NEMA 7-PIN standards can be utilized with the PR7 receptacle.

**Dimming Occupancy Sensor** (SPB, MS/DIM-LXX and MS-LXX) These sensors are factory installed in the luminaire housing. When the SPB or MS/DIM sensor options are selected, the luminaire will dim down after five minutes of no activity detected. When activity is detected, the luminaire returns to full light output. When a sensor for ON/OFF operation (MS-LXX) is selected, the luminaire will turn off after five minutes of no activity. These occupancy sensors include an integral photocell for “dusk-to-dawn” control or “daylight harvesting.” Factory default is enabled for the MS sensors and disabled for the SPB. SPB motion sensors require the Sensor Configuration mobile application by Wattstopper to change factory default dimming level, time delay, sensitivity and other parameters. Available for iOS and Android devices. The SPB sensor is factory preset to dim down to approximately 10% power with a time delay of five minutes.

**WaveLinx Wireless Control and Monitoring System** Available in 7-PIN or 4-PIN configurations, the WaveLinx Outdoor control platform operates on a wireless mesh network based on IEEE 802.15.4 standards enabling wireless control of outdoor lighting. At least one Wireless Area Controller (WAC) is required for full functionality and remote communication (including adjustment of any factory pre-sets).

**WaveLinx Outdoor Control Module (WOLC-7P-10A)** A photocontrol that enables astronomic or time-based schedules to provide ON, OFF and dimming control of fixtures utilizing a 7-PIN receptacle. The out-of-box functionality is ON at dusk and OFF at dawn.

**WaveLinx Wireless Sensor (SWPD4 and SWPD5)** These outdoor sensors offer passive infrared (PIR) occupancy sensing and a photocell for closed-loop daylight sensing. These sensors can be factory installed or field-installed via simple, tool-less integration into luminaires equipped with the Zhaga Book 18 compliant 4-PIN receptacle (ZD or ZW). These sensors are factory preset to dim down to approximately 50 percent power after 15 minutes of no activity detected, and the photocell for “dusk-to-dawn” control is default enabled. A variety of sensor lenses are available to optimize the coverage pattern for mounting heights from 7'-40'.

**LumenSafe (LD)** The LumenSafe integrated network camera is a streamlined, outdoor-ready camera that provides high definition video surveillance. This IP camera solution is optimally designed to integrate into virtually any video management system or security software platform of choice. No additional wiring is needed beyond providing line power to the luminaire. LumenSafe features factory-installed power and networking gear in a variety of networking options allowing security integrators to design the optimal solution for active surveillance.

<b>NOTES:</b> 1. DesignLights Consortium® Qualified. Refer to <a href="http://www.designlights.org">www.designlights.org</a> Qualified Products List under Family Models for details. 2. Nominal drive currents shown here. For actual drive current by configuration, refer to Power and Lumens tables. 3. 480V not to be used with ungrounded or impedance grounded systems. 4. Only available on Surface Wall Mount (SM) mounting. 5. Must use with Universal (U) voltage only. Not available with other voltage options. Not available with PA1D light engine. 6. House Side Shield not for use with SWQ distribution. 7. Not available with EBP, CBP, or CBP-CEC options. Not available with PA1D light engine. 8. Salt spray tested to over 5,000-hours per ASTM B117 with a scribe rating of 9 per ASTM D1654. Also achieves 7,000-hour rating per ASTM B117 with a scribe rating of 4 per ASTM D1654. Extended lead times may apply. 9. Option is not available with other controls: photocontrols (BPC), photocontrol receptacles (PR or PR7), or controls systems (MS, ZD, or ZW). 10. If High Voltage (H) or DuraVolt (DV) is specified, use a photocontrol that matches the input voltage used. 11. Option not available with High Voltage (H). Must specify Universal (U), 347V (9), or 480V (8) voltage. 12. Utilizes the Wattstopper sensor FSP-211. Sensor color white unless specified otherwise via PDR. To field-configure, order FSIR-100 accessory separately. 13. Utilizes the Wattstopper sensor FSP-3XX series. Sensor color determined by product finish. See Sensor Color Reference Table. Field-configures via mobile application. See Controls section for details. 14. Sensor passive infrared (PIR) may be overly sensitive when operating below -20°C (-4°F). 15. In order for the device to be field-configurable, requires WAC Gateway components WAC-PoE and WPOE-120 in appropriate quantities. Only compatible with WaveLinX system and software and requires system components to be installed for operation. See website for more Wavelinx application information. 16. Replace XX with sensor color (WH, BZ or BK). 17. Requires 4-PIN twistlock receptacle option (ZD or ZW) option. 18. For BAA or TAA requirements, Accessories sold separately will be separately analyzed under domestic preference requirements. Consult factory for further information. 19. Replace XX with paint color. 20. Controls and/or emergency battery packs operate only one of the two circuits when 2L is specified. 21. This tool enables adjustment to Motion Sensor (MS) parameters including high and low modes, sensitivity, time delay, cutoff and more. Consult your lighting representative for more information. 22. Requires 7-PIN NEMA twistlock photocontrol receptacle (PR7) option. The WOLC-7 cannot be used in conjunction with other controls systems (MS, ZD, or ZW). Only for use at 120-347V. 23. Only product configurations with these designated prefixes are built to be compliant with the Buy American Act of 1933 (BAA) or Trade Agreements Act of 1979 (TAA), respectively. Please refer to <a href="http://DOMESTIC.PREFERENCES">DOMESTIC.PREFERENCES</a> website for more information. Components shipped separately may be separately analyzed under domestic preference requirements. 24. DuraVolt drivers feature added protection from power quality issues such as loss of neutral, transients and voltage fluctuations. Visit <a href="http://www.signify.com/duravolt">www.signify.com/duravolt</a> for more information.							

## Mounting Details

### Surface Mount Plate (SM)

### Surface Mount Assembly (SM)

### Wall Mount (WM)

## Product Specifications

### Construction

- Single-piece die-cast aluminum housing
- Tethered die-cast aluminum door
- Surface Mount (SM) offers two 1/2" NPT conduit entry plugs
- Not suitable for inverted mount installation

### Optics

- Dark Sky Approved (3000K CCT and warmer only)
- Precision molded polycarbonate optics

### Electrical

- -40°C minimum operating temperature
- 40°C maximum operating temperature

- >.9 power factor
- <20% total harmonic distortion
- Class 1 electronic drivers have expected life of 100,000 hours with <1% failure rate
- 0-10V dimming driver is standard with leads external to the fixture
- Standard MOV surge protective device designed to withstand 10kV of transient line surge

### Typical Applications

- Outdoor, Pedestrian Pathways, Building Entrances, Loading Docks, Perimeter Parking Lots

### Finish

- Five-stage super TGIC polyester powder coat paint, 2.5 mil nominal thickness

### Shipping Data

- Prevail Petite (with CBP): 21 lbs. (9.53 kgs.)

### Warranty

- Five year limited warranty, consult website for details. [www.cooperlighting.com/legal](http://www.cooperlighting.com/legal)

**NOTES:**  
1. For 3000K or HSS BUG Ratings, refer to published IES files.

### Power and Lumens: Emergency Configurations

Light Engine		PA1A	PA1B	PA1C
Power (Watts) <sup>1</sup>		37	59	78
Input Current @ 120V (A)		0.33	0.52	0.68
Input Current @ 277V (A)		0.16	0.24	0.31
Distribution <sup>2</sup>				
Type II Roadway	4000K/5000K Lumens	2,035		
	3000K Lumens	1,853		
Type II Urban	4000K/5000K Lumens	2,030		
	3000K Lumens	1,849		
Type III	4000K/5000K Lumens	2,007		
	3000K Lumens	1,827		
Type IV Wide	4000K/5000K Lumens	1,964		
	3000K Lumens	1,788		
Type V Square Wide	4000K/5000K Lumens	2,031		
	3000K Lumens	1,849		

**NOTES:**  
1. Power and current based on full power consumption while EBP or CBP is charging.  
2. Estimated lumen outputs while luminaire is operating in emergency mode only at full charge.

### Lumen Maintenance

Configuration	TM-21 Lumen Maintenance (50,000 Hours)	Theoretical L70 (Hours)
Up to 50°C	96.76%	> 663,000

### Sensor Color Reference Table (SPBx)

Housing Finish	Sensor Color
AP=Grey	Grey
BZ=Bronze	Bronze
BK=Black	Black
DP=Dark Platinum	Grey
GM=Graphite Metallic	Black
WH=White	White

### Lumen Multiplier

Ambient Temperature	Lumen Multiplier
0°C	1.02
10°C	1.01
25°C	1.00
40°C	0.99
50°C	0.97

## Control Options

**0-10V** This fixture provides 0-10V dimming wire leads for use with a lighting control panel or other control method.

**Photocontrol** (PR and PR7) Photocontrol receptacles provide a flexible solution to enable “dusk-to-dawn” lighting by sensing light levels. Advanced control systems compatible with NEMA 7-PIN standards can be utilized with the PR7 receptacle.

**Dimming Occupancy Sensor** (SPB, MS/DIM-LXX and MS-LXX) These sensors are factory installed in the luminaire housing. When the SPB or MS/DIM sensor options are selected, the luminaire will dim down after five minutes of no activity detected. When activity is detected, the luminaire returns to full light output. When a sensor for ON/OFF operation (MS-LXX) is selected, the luminaire will turn off after five minutes of no activity. These occupancy sensors include an integral photocell for “dusk-to-dawn” control or “daylight harvesting.” Factory default is enabled for the MS sensors and disabled for the SPB. SPB motion sensors require the Sensor Configuration mobile application by Wattstopper to change factory default dimming level, time delay, sensitivity and other parameters. Available for iOS and Android devices. The SPB sensor is factory preset to dim down to approximately 10% power with a time delay of five minutes.

**WaveLinx Wireless Control and Monitoring System** Available in 7-PIN or 4-PIN configurations, the WaveLinx Outdoor control platform operates on a wireless mesh network based on IEEE 802.15.4 standards enabling wireless control of outdoor lighting. At least one Wireless Area Controller (WAC) is required for full functionality and remote communication (including adjustment of any factory pre-sets).

**WaveLinx Outdoor Control Module (WOLC-7P-10A)** A photocontrol that enables astronomic or time-based schedules to provide ON, OFF and dimming control of fixtures utilizing a 7-PIN receptacle. The out-of-box functionality is ON at dusk and OFF at dawn.

**WaveLinx Wireless Sensor (SWPD4 and SWPD5)** These outdoor sensors offer passive infrared (PIR) occupancy sensing and a photocell for closed-loop daylight sensing. These sensors can be factory installed or field-installed via simple, tool-less integration into luminaires equipped with the Zhaga Book 18 compliant 4-PIN receptacle (ZD or ZW). These sensors are factory preset to dim down to approximately 50 percent power after 15 minutes of no activity detected, and the photocell for “dusk-to-dawn” control is default enabled. A variety of sensor lenses are available to optimize the coverage pattern for mounting heights from 7'-40'.

Datasheet: **TLC-LED-900 Luminaire and Driver****Luminaire Data**

Weight (luminaire)	40 lb (18 kg)
UL listing number	E338094
UL listed for USA / Canada	UL1598 CSA-C22.2 No.250.0
CE Declaration	LVD, EMC, RoHS
Ingress protection, luminaire	IP65
Material and finish	Aluminum, powder-coat painted
Wind speed rating (aiming only)	150 mi/h (67 m/s)
UL, IEC ambient temperature rating, luminaire	50°C (122°F)

**Photometric Characteristics**

Projected lumen maintenance per IES TM-21-11

L90 (13.5k)	>81,000 h
L80 (13.5k)	>81,000 h
L70 (13.5k)	>81,000 h
CIE correlated color temperature	5700 K
Color rendering index (CRI)	75 typ, 70 min
Lumens <sup>1</sup>	89,600

Footnotes:

1) Incorporates appropriate dirt depreciation factor for life of luminaire.
