Please see attached TED recommended sign and marking improvements to Mr. Steeber and his response back. This is in relation to the Res #2016-R056 to request traffic study for 4th St one block directional conversion (one way to two way) and is on the LU agenda this afternoon. We believe citizen concerns are/will be addressed and this paper can be withdrawn (DPW opposes the paper).

Thanks.

First of all, thank you for your prompt attention to our concerns. Thank you also for your ideas on the matter. I think that your thoughts will certainly help the matter, so let's try the additional signs and street markings. Again, thank you. Don Steeber, The Richmond Ballet
