Program Objectives

The objective of the State Homeland Security Program is to assist state and local preparedness activities that address high-priority preparedness gaps across all core capabilities that support terrorism preparedness. All supported investments are based on capability targets and gaps identified during the Threat and Hazard Identification and Risk Assessment (THIRA) process, and assessed in the State Preparedness Report (SPR).

The FY 2019 Homeland Security Grant Program (HSGP) supports state and local efforts to prevent terrorism and other catastrophic events and to prepare the Nation for the threats and hazards that pose the greatest risk to the security of the United States. References to these priorities can be found throughout this document. The FY 2019 HSGP provides funding to implement investments that enhance terrorism preparedness and serve to build, sustain, and deliver the 32 core capabilities essential to achieving the National Preparedness Goal (the Goal) of a secure and resilient Nation. The allowable costs under FY 2019 HSGP support the core capabilities across the five mission areas of Prevention, Protection, Mitigation, Response, and Recovery.

Important Award Terms and Conditions

Subrecipients must comply with the following federal requirements:

- FY 2019 Homeland Security Grant Program (HSGP) Notice of Funding Opportunity  
Homeland Security Grant Program (HSGP) NOFO
- Department of Homeland Security Standard Terms and Conditions for 2019  
DHS Standard Terms and Conditions
- 2 CFR Part 200 Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards  
2 CFR Part 200 Uniform Administrative Requirements

*Saving lives through effective emergency management and homeland security.  
"A Ready Virginia is a Resilient Virginia."*

*Management and Administration (M&A)*

Your local emergency management agency may retain and use up to five percent of the award for local management and administration purposes. M&A activities are those directly related to managing and administering SHSP Program funds, such as financial management and monitoring. It should be noted that salaries of local emergency management managers are not typically categorized as M&A, unless the local emergency management agency chooses to assign personnel to specific M&A activities.

*Indirect (Facilities & Administrative [F&A]) Costs*

Indirect costs are allowable under this program, as described in 2 C.F.R. § 200.414. With the exception of recipients who have never received a negotiated, indirect cost rate as described in 2 C.F.R. § 200.414(f), recipients must have an approved indirect cost rate agreement with their cognizant Federal agency to charge indirect costs to this award. A copy of the approved rate (a fully executed, agreement negotiated with the applicant's cognizant Federal agency) is required at the time of application, and must be provided to FEMA before indirect costs are charged to the award.

Extensions to the initial period of performance identified in the subaward will only be considered through formal, written requests addressed to VDEM, and must contain specific and compelling justifications as to why an extension is required. Subrecipients are advised to coordinate with the Grant Administrator, as needed, when preparing an extension request. All extension requests must address the following:

1. Grant program, fiscal year, and subaward ID number in eGMS

3. Current status of the activity/activities

5. Amount of funds drawn down to date
6. Remaining available funds, both Federal and non-Federal
7. Budget outlining how remaining Federal and non-Federal funds will be expended

Extension requests will be granted only due to compelling legal, policy, or operational challenges. Extension requests will only be considered for the following reasons:

- Contractual commitments by the grant recipient with vendors or subrecipients prevent completion of the project within the existing period of performance
- The project must undergo a complex environmental review that cannot be completed within existing period of performance
- Projects are long-term by design and therefore acceleration would compromise core programmatic goals
- Where other special circumstances exist

Recipients must submit all extension requests to VDEM via upload into eGMS no later than 90 days prior to June 30, 2021.

Sub-Grantee: Richmond Fire and Emergency Services

Sub-Grantee POC: Anthony McLean

Project title: City of Richmond Command Post Enhancement

Project location (physical address or latitude-longitude): 201 East Franklins Street, Richmond, Virginia 23219

**Project Description.** Provide a complete project description. The project description should contain a summary of what specific action is proposed, where it is proposed, how it will be implemented. Include a brief description of the objectives the project is designed to accomplish (the purpose), and the reason the project is needed. Use additional pages if necessary. If multiple sites are involved, provide the summary for each site.

This project will enhance the capabilities of the City of Richmond Mobile Command Post (MCP). The MCP is an invaluable asset to large scale responses, special events, and exercises. In a typical year, the command post is used 15-20 times, and is increasing in use as more city staff are trained to drive, operate and troubleshoot the vehicle. This project will enhance the capabilities of the MCP by providing (2) Pan Tilt Zoom (PTZ) cameras with infrared (IR) capabilities and (2) panoramic cameras in multiple locations on the vehicle. The cameras will also be network ready and be able to connect to the city's current camera network. This will provide interoperability to the other city departments, allowing them situational awareness of the incident scene. This vehicle regularly supports Richmond Police with monitoring the safety and security of the incident scene, and IR cameras will greatly enhance their ability to do so at night. While many of our emergency events happen at all hours, most of our special events last long into the night.

While this vehicle has never been requested to neighboring jurisdictions, it is part of our mutual aid to our neighbors.

## **Appendix A. Guidance for Supporting Photographs for EHP Grant Submissions**

Photographs are a vital component of the EHP review process and add an additional level of understanding about the nature and scope of the project. They also provide pre-project documentation of site conditions. Please follow the guidance provided below when preparing photographs for your EHP submission. The following pages provide examples of best practices used in earlier EHP submissions.

### **Minimum requirements for photographs**

1. Photographs should be in color.
2. Label all photographs with the name of facility, location (city/county, state) and physical location (physical address or latitude-longitude).
3. Label the photographs to clearly illustrate relevant features of the project, such as location of installed features (e.g., cameras, fences, sirens, antennas, generators) and ground disturbance. See examples below.
4. Identify ground disturbance. Adding graphics to a digital photograph is a means to illustrate the size, scope and location of ground disturbing activities.

### **Best Practices**

1. Provide photographs in a separate file.
2. Place no more than 2 pictures per page.
3. Compressing pictures files (such as with Microsoft Picture Manager)<sup>1</sup> or saving the file in PDF format will reduce the size of the file and facilitate e-mail submissions.
4. Identify the photograph file with the project name so that it can be matched to the corresponding FEMA EHP screening form.
5. Maximum file size for enclosures should not exceed 12 MB. If the total size of files for an EHP submission exceeds 12 MB, send the submission in multiple e-mails.
6. If necessary, send additional photographs or data in supplemental e-mails. Please use the same e-mail subject line with the additional label: 1 of x, 2 of x, . . . x of x.

### **Options for Creating Photographs**

1. Obtain an aerial photo. There are multiple online sources for aerial photographs.
2. For the aerial photo, use the screen capture feature (Ctrl + Print Screen keys) and copy the image to photo editing software, such as Paint, or PhotoShop.<sup>1</sup> Use that software to crop the image so the photo has the content necessary.
3. Open PowerPoint, or other graphics-oriented software, and paste the aerial or ground-level photograph on the canvas.
4. Use drawing tools, such as line drawing and shapes, to indicate the location of project features (for example: fencing, lighting, sirens, antennas, cameras, generators).
5. Insert text to label the features and to label the photograph.
6. Use drawing tools to identify ground-disturbing activities (if applicable).
7. Save the file with the project name or grant number so that it can be appropriately matched to the corresponding FEMA EHP screening form. Include this file with the EHP screening when submitting the project.

## Example Photographs

**Aerial Photographs.** The example in Figure 1 provides the name of the site, physical address and proposed location for installing new equipment. This example of a labeled aerial photograph provides good context of the surrounding area.

Figure 1. Example of labeled, color aerial photograph.

**Ground-level photographs.** The ground-level photograph in Figure 2 supplements the aerial photograph in Figure 1, above. Combined, they provide a clear understanding of the scope of the project. This photograph has the name and address of the project site, and uses graphics to illustrate where equipment will be installed.

Figure 2. Example of ground-level photograph showing proposed attachment of new equipment.

## Appendix A. Supporting Photographs for EHP Grant Submissions

**Ground-level photograph with equipment close-up.** Figure 3 includes a pasted image of a CCTV camera that would be placed at the project site. Using desktop computer software, such as PowerPoint,<sup>1</sup> this can be accomplished by inserting a graphic symbol (square, triangle, circle, star, etc.) where the equipment would be installed. This example includes the name and location of the site. The site coordinates are in the degree-minute-second format.

**Ground-level photograph with excavation area close-up.** The example in Figure 4 shows the proposed location for the concrete pad for a generator and the ground disturbance to connect the generator to the building's electrical service. This information can be illustrated with either an aerial or ground-level photograph, or both. This example has the name and physical address of the project site.

## Appendix A. Supporting Photographs for EHP Grant Submissions

**Communications equipment photographs.** The example in Figure 5 supports a project involving installation of equipment on a tower. Key elements are identifying where equipment would be installed on the tower, name of the site and its location. This example provides site coordinates in decimal format.

Any County Tower, State: 12.3456° N, 34.5678° W

Figure 5. Ground-level photograph showing proposed locations of new communications equipment on an existing tower.

**Interior equipment photographs.** The example in Figure 6 shows the use of graphic symbols to represent security features planned for a building. The same symbols are used in the other pictures where the same equipment would be installed at other locations in/on the building. This example includes the name of the facility and its physical address.

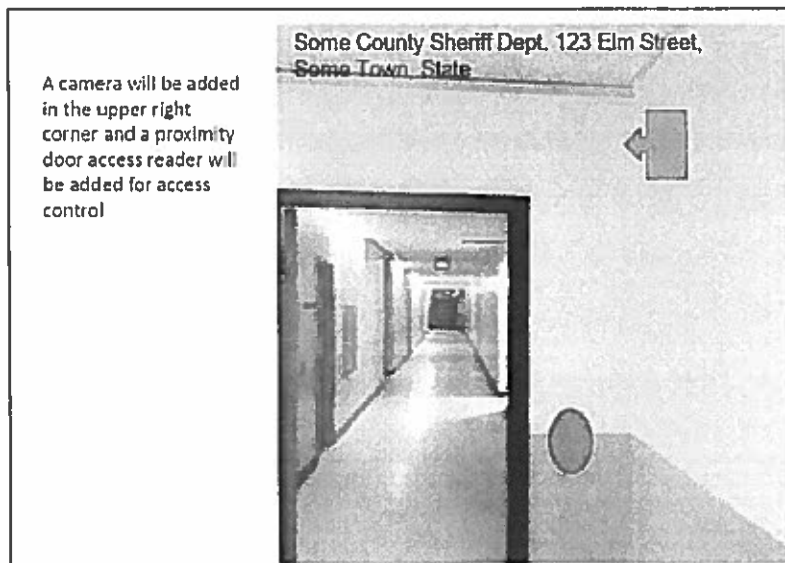

Figure 6. Interior photograph showing proposed location of new equipment.

**Ground-level photographs of nearby historic structures and buildings.** Consultation with the State Historic Preservation Office (SHPO) may be required for projects involving structures that are more than 50 years old, or are on the National Register of Historic Places. In that event, it will be necessary to provide a color, ground-level photograph of each side of the building/structure.

<sup>1</sup> Use of brand name does not constitute product endorsement, but is intended only to provide an example of the type of product capable of providing an element of the EHP documentation.
