Richmond City Council Composite List of Priorities American Rescue Plan Act Funding Work Session, Tuesday, Sept. 7, 2021 at 2:30 p.m.

### **Agenda**

## Introduction of Today's Agenda and Process

**Review the ARPA Composite List** 

Patrons can clarify the items with a brief description (Agreement only on the items, not \$ amount) Next Steps

Below, please find a composite list of priorities submitted by all Councilmembers for discussion of the American Rescue Plan Act funding. Council will review these suggestions, Sept 7th. The composite list for all Councilmember submissions can be accessed on the first tab below. Councilmember worksheets for all nine members are attached on the additional tabs. The worksheet contains the submissions received by August 2nd, and the additional items received by September 2nd.

- The ARPA Funding can be used within these areas:Public Health and Economic Impacts
  - Premium Pay
  - Revenue Loss
  - Investments in Infrastructure

Eligible uses must be in response to the disease itself or the harmful consequences of the economic disruptions resulting from or exacerbated by the COVID-19 public health emergency and cannot be grossly disproportionate to the harm experienced.

## Recommendations for RVA Recovery Investment Plan Presented by Ellen F. Robertson VP 6<sup>th</sup> District Richmond City Council

#### **Purpose Statement:**

Qualifying census tracts (QCTs) which include the neighborhoods established by historic racial discrimination and disinvestment policies are directly identified in the guidelines for support of the ARPA funds to achieve recovery for those most severely impacted by COVID19. Qualifying census tracts are defined in the final guidelines as tracts with 50% of households earning less than 60% of AMI or have a poverty rate of 25%. The guidelines also identify public health, social services, education, childcare, and housing insecurity-lack of affordable housing and homelessness- as qualified services for recovery in qualified census tracts.

During the pandemic African American and other families and individuals of QCTs were not only the greatest and most severely impacted, they also suffered severe stress and mental anxiety from continual reports daily of how they were at the highest risk of losing their lives and the lives of those they love. The guidelines also acknowledge that the disparities experienced are due largely in part to racism and discrimination against people of color and those living in QCTs.

Now that dollars are here to provide recovery, let us not continue our racial policies of ignoring the primary people marked throughout the pandemic. As we plan to spend these recovery dollars, let us continue to tell those greatest and most severely impacted that Richmond will ensure that they receive the greatest share of the recovery funds.

#### Recommended Recovery Plan

#### Health - \$55 Mil.

Households in the Qualified Census Tracts (QCTs) have extreme poor health due to spacial isolation, environmental pollutions and heat deserts. Other contributing conditions are a lack of access to quality food, lack of public safety and other essential quality living resources. In QCTs, ARP will fund community health centers to provide family medical services to include prenatal care, mental health and conflict resolution, drug addiction prevention, and COVID medical care.

#### 1. Health Medical Centers: \$40Mil.

Health Medical Center in QCTs' neighborhood business zones—Highland Park, East Church Hill, RRHA Communities (expand existing), Bellemeade, Oakgrove, Downtown, Richmond Highway, Hickory Hill and Southside Community Center. - 6th District - Annie Giles Center and Ann Hardy Center\*

#### 2. Healthy and Nutritional Foods: \$10Mil.

To eliminate food deserts, healthy and nutritional foods will be provide to address health disparities. - 6th District MOSBY COURT \*

3. COVID Employee Disability Liability Insurance: \$5Mil.

To provide small business which hire residents of the QCTs assistance to cover employee insurances.

#### Social Services: \$10Mil.

1. Racism Reform – \$2.0Mil.

The primary root cause for injustice, inequality and poverty is directly due to racism.

For families and individuals of QCTs to achieve sustainable recovery, racism must be addressed as a root cause. Working in partnership with the equity and inclusion policy of the City, ARP fund with create racism prevention tools which regulate all policies to eliminate inherent historical racism and remove any race policies being implemented. Existing land use, housing, tax incentives, employments and education policies will be revised and no new programs and policies will be executed which does not meet the no-racism evaluation. (supports resolution - RACISM is a Public Health Crisis)\*

2. Household Recovery Fund: \$8 Mil.

Household members in QCTs who were disabled, lost lives, and/or incomes due to the virus will be provided financial and social service support in counseling, debt reduction and relief, and others resources as needed to recover to prepandemic status, and to reduce high risks in the future.

#### Education and Economic Instability: \$18Mil.

1. Workforce Development and Training Fund: \$10Mil.

To leverage small business sustainable wages for employment of QCT households' youth and adults

2. Higher Education/Technical grants for high school graduates and drop outs - \$8 Mil.

#### Childcare: \$15Mil.

1. Quality Child Care and Parental Development Coop: \$15Mil.

The QCTs have the highest concentrated children population per acre in the City. ARP funds will establish parents shared owned child care centers which offers career development training to prepare parents to raise their children and prepare for future careers in the medical and educational fields. Parents cost will be on a sliding scale, based on income and participation in career development training and volunteer services.- 6th District Annie Giles and Ann Hardy Centers\*

#### Housing and Homelessness: \$40Mil.

- 1. Affordable Housing Trust Fund (AHTF) -\$20 million over 3 years
- 2. Shovel ready Affordable Housing Development -Highland Grove \$12Mil.-6th District\*

Creighton - \$10 Mil.

Transitional and Homeless Housing - \$8 Mil.

<u>The next step</u> in the ARPA funding process is that <u>Richmond City Council de</u> worksheet is provided for Council to input your desired goals and project for  $2^{nd}$  at 8 a.m. for the items to be added to the cumulative list for discussion

Councilmembers, please list project items and impact statements under the lead to discussions to finalize Council's priorities at the next Work Session. As sources of funding similar focus anticipated through the state and federal

#### The ARPA Funding can be used within these areas:

- Public Health and Economic Impacts
- Premium Pay
- Revenue Loss
- Investments in Infrastructure

Eligible uses must be in response to the disease itself or the harmful consequences of the economic cannot be grossly disproportionate to the harm experienced.

Recommendations for RVA Recovery Investment Plan Presented by Ellen F. Robertson VP 6<sup>th</sup> District Richmond City Council Purpose Statement:

Qualifying census tracts (QCTs) which include the neighborhoods established by historic racial discrimination and disinvestment policies are directly identified in the guidelines for support of the ARPA funds to achieve recovery for those most severely impacted by COVID19. Qualifying census tracts are defined in the final guidelines as tracts with 50% of households earning less than 60% of AMI or have a poverty rate of 25%. The guidelines also identify public health, social services, education, childcare, and housing insecurity-lack of affordable housing and homelessness- as qualified services for recovery in qualified census tracts.

During the pandemic African American and other families and individuals of QCTs were not only the greatest and most severely impacted, they also suffered severe stress and mental anxiety from continually reports daily of how they were at the highest risk of losing their lives and the lives of those they love. The guidelines also acknowledge that the disparities experienced are due largely in part to racism and discrimination against people of color and those living in QCTs.

Now that dollars are here to provide recovery, let us not continue our racial policies of ignoring the primary people marked throughout the pandemic. As we plan to spend these recovery dollars, let us continue to tell those greatest and most severely impacted that Richmond will ensure that they receive the greatest share of the recovery funds.

### **Recommended Recovery Plan**

### Public Health - \$55 Mil.

Households in the Qualified Census Tracts (QCTs) have extreme poor health due to spacial isolation, environmental pollutions and heat deserts. Other contributing conditions are a lack of access to quality food, lack of public safety and other essential quality living resources. In QCTs, ARP will fund community health centers to provide family medical services to include prenatal care, mental health and conflict resolution, drug addiction prevention, and COVID medical care.

1. Health Medical Centers: \$40Mil.

Health Medical Center in QCTs' neighborhood business zones—Highland Park, East Church Hill, RRHA Communities (expand existing), Bellemeade, Oakgrove, Downtown, Richmond Highway, Hickory Hill and Southside Community Center. - 6th District - Annie Giles Center and Ann Hardy Center\*

2. Healthy and Nutritional Foods: \$10Mil.

To eliminate food deserts, healthy and nutritional foods will be provide to address health disparities. - 6th District MOSBY COURT \*

3. COVID Employee Disability Liability Insurance: \$5Mil.

To provide small business which hire residents of the QCTs assistance to cover employee insurances.

### Social Services: \$10Mil.

1. Racism Reform – \$2.0Mil.

The primary root cause for injustice, inequality and poverty is directly due to racism.

For families and individuals of QCTs to achieve sustainable recovery, racism must be addressed as a root cause. Working in partnership with the equity and inclusion policy of the City, ARP fund with create racism prevention tools which regulate all policies to eliminate inherent historical racism and remove any race policies being implemented. Existing land use, housing, tax incentives, employments and education policies will be revised and no new programs and policies will be executed which does not meet the no-racism evaluation. (supports resolution - RACISM is a Public Health Crisis)\*

2. Household Recovery Fund: \$8 Mil.

Household members in QCTs who were disabled, lost lives, and/or incomes due to the virus will be provided financial and social service support in counseling, debt reduction and relief, and others resources as needed to recover to prepandemic status, and to reduce high risks in the future.

### Education- Career Development for Economic Instability: \$18Mil.

1. Workforce Development and Training Fund: \$10Mil.

To leverage small business sustainable wages for employment of QCT households' youth and adults

2. Higher Education/ Technical grants for high school graduates and drop outs - \$8 Mil.

### Childcare and Parent Development: \$15Mil.

1. Quality Child Care and Parental Development Coop: \$15Mil.

The QCTs have the highest concentrated children population per acre in the City. ARP funds will establish parents shared owned child care centers which offers career development training to prepare parents to raise their children and prepare for future careers in the medical and educational fields. Parents cost will be on a sliding scale, based on income and participation in career development training and volunteer services.- 6th District Annie Giles and Ann Hardy Centers\*

### Housing insecurity-lack of affordable housing and homelessness: \$40Mil.

- 1. Affordable Housing Trust Fund (AHTF) -\$20 million over 3 years
- 2. Shovel ready Affordable Housing Development -Highland Grove \$12Mil.-6th District\*

Creighton - \$10 Mil.

Transitional and Homeless Housing - \$8 Mil.
