RE: To authorize the special use of the property known as 1101 North Arthur Ashe Boulevard, for the purpose of a mixed-use building containing up to 29 dwelling units, upon certain terms and conditions.

ORD. OR RES. No.

PURPOSE: To authorize the special use of the property known as 1101 North Arthur Ashe Boulevard, for the

purpose of a mixed-use building containing up to 29 dwelling units, upon certain terms and conditions.

REASON: The applicant has requested a special use permit to allow a mixed-use building to include dwelling units that will have five to six bedrooms with a communal kitchen and living area. The dwelling units are intended to be occupied by more than three unrelated persons. Furthermore, bedrooms will be lockable from the outside and not accessible to other tenants should they be unrented. These provisions are not allowed by the Zoning Ordinance, a Special Use Permit is therefore required to accomplish this request.

RECOMMENDATION: In accordance with the requirements of the City Charter and the Zoning Ordinance, the City Planning Commission will review this request and make a recommendation to City Council. This item will be scheduled for consideration by the Commission at its July 20, 2020 meeting.

BACKGROUND: The subject property consists of a parcel totaling 13,343 SF (.309 acres) of land improved with a garage and unscreened parking area. The property is a part of the greater Scott's Addition area in the City's Near West Planning District, and has frontage on both North Arthur Ashe Boulevard and Myers Street.

The City of Richmond's current Pulse Corridor Plan designates the subject property for Nodal Mixed Use (NO-MU). The plan calls for development aligned with the Transit-oriented district located immediately adjacent to the Pulse BRT or other frequent transit service at key gateways and prominent places in the city in order to provide for significant, urban-form development in appropriate locations. Higher-density pedestrian- and transit-oriented development encouraged on vacant and underutilized sites; new development should be urban in form and may be of larger scale than existing context. It should directly engage with the prominence of Nodal Mixed-Use places and the public realm. Highly active street frontages and urban design features that encourage pedestrian activity are required. Driveway entrances required to be off alleys whenever possible; new driveways prohibited on street-oriented commercial and priority street frontages. Little to no setback of new development unless to create pedestrian-oriented amenities like plazas and outdoor dining. Surface parking prohibited as a principal use; when surface parking is provided as an accessory use, it should be located to the rear of buildings and screened by shade trees. Parking requirements are reduced to allow more market-based parking strategies, including shared parking.

The property is currently zoned TOD-1 Transit-Oriented Nodal District as are surrounding parcels to the north, south, east, and west. A mix of commercial, residential, office, and institutional land uses are present in the area.

The intent of the TOD-1 district is to encourage dense, walkable transit-oriented development consistent with the objectives of the master plan and to promote enhancement of the character of this development along principal corridors, at key gateways, and at nodes of high activity located near transit service, bicycle infrastructure, and pedestrian-friendly streetscapes. The district regulations are also intended to safeguard the character of adjoining properties by only being applied in areas that meet the criteria above, with buffering by setbacks and screening or transitional districts to lower intensity residential areas.

The district regulations are intended to encourage redevelopment and place-making, including adaptive reuse of underutilized buildings, to create a high-quality urban realm. They are intended to improve streetscape character by providing continuity of building setbacks, to enhance public safety by encouraging an active pedestrian environment consistent with the mixed-use character of the district by providing for windows in building façades along street frontages, and to promote an environment that is safe for walking and biking.
